

INDEX TO SUBJECTS

Names of authors of original articles (O), editorials (E), and correspondence (C) are distinguished by large and small capital letters. Authors of abstracted articles (A), obituaries (Ob), news and notes (N), and book reviews (B) are in ordinary type. (S) denotes XI International Leprosy Congress materials.

Acedapsona,	
in prevention of leprosy, in Micronesia. Russell, D. A., <i>et al.</i>	(A) 329
	(A) 655
in the treatment of 70 lepromatous patients. Samson, P. D., <i>et al.</i>	(A) 435
trial, status at ten years, in Karimui, New Guinea. Russell, D. A., <i>et al.</i>	(A) 435
Acetylcholine sweat function test (SFT),	
effect of therapeutic regimens, in tuberculoid leprosy. Venetsanos, P., <i>et al.</i>	(A) 349
Acid,	
ascorbic, immunological effects and hazards.	(A) 529
fatty, radiometric measurement of differential metabolism of, by <i>M. lepraemurium</i> . CARMARGO, E. E., <i>et al.</i>	(O) 126
— serum free, glucose tolerance in leprosy. Bharadwaj, V. P., <i>et al.</i>	(A) 641
mycolic, detection of, in leprosy tissue. DEVI, S. and STEWART-TULL, D. E. S.	(O) 484
Acid-fast characteristics,	
bacilli, attenuation of drug-treated murine leprosy, in mice, A. examination of mice administered drugs, B. examination of drug resistance. Sushida, K.	(A) 230
figures of multiplication, in nude mice macrophages. Fukunishi, Y., <i>et al.</i>	(A) 668
large bodies, in leprosy material. Nakayama, T. and Endo, H.	(A) 102
	(A) 369
of <i>M. leprae</i> , problems raised by its cultivation. Delville, J.	(A) 357
pyridine extractability of, from <i>M. leprae</i> . MCCORMICK, G. T. and SANCHEZ, R. M. ..	(O) 495
Acro-osteolysis,	
in Hansen's disease. Molerés, R. and Enna, C. D.	(A) 422
Adenosine 3':5'-monophosphate,	
phagosome-lysosome fusion, in macrophages, infected with mycobacteria. Lowrie, D. B., <i>et al.</i>	(A) 649
Africa,	
Ethiopia, ALERT, announces provisional program of courses for 1979-1980.	(N) 524
—, —, holds Conference on Leprosy Training.	(N) 523
—, —, Kellersberger Memorial Lecture given by Dr. R. C. Hastings. Wheate, H. W. (N)	524
—, —, Mr. Onni Niskanen appointed Executive Director.	(N) 202
—, dapsone-resistant leprosy in. Pearson, J. M. H., <i>et al.</i>	(A) 639
Francophone, mass anti-leprosy campaigns in. Nebout, M.	(A) 327
Leprosy Mission sponsors seminars in.	(N) 66
Malawi, dermatological clinic in, leprosy control scheme in, ten years' experience. Rampen, F.	(A) 92
metabolic disposition of dapsone in . . . leprosy patients. Peters, J. H., <i>et al.</i>	(A) 217
Morocco, leprosy in. Sekkat, A., <i>et al.</i>	(A) 326
—, relapse and dapsone resistance in. Rollier, M., <i>et al.</i>	(A) 434
Sierra Leone, leprosy statistics.	(N) 203
—, Rev. Rocco Serra receives Award of Officer of the Order of Rokel (O. R.).	(N) 203
Somalia, leprosy control campaign in, integration into National Health Services. Tarabini, G. L. and Tarabini, G.	(A) 325
South Africa, genetic markers and leprosy in . . . Negroes. Hitzeroth, H. W., <i>et al.</i> ...	(A) 551
Tanzania, Leprosy Association, inauguration of.	(N) 66
Uganda, genetic factors, of children in, in leprosy. White, S. J., <i>et al.</i>	(A) 92
ALERT (All Africa Leprosy and Rehabilitation Training Centre),	
announcement of provisional program of courses for 1979-1980.	(N) 524
Conference of Leprosy Training held by.	(N) 523

Kellersberger Memorial Lecture given by Dr. R. C. Hastings. Wheate, H. W. (N)	524
Mr. Bernt Johannessen appointed new Executive Director. (N)	202
Mr. Onni Niskanen retires as Executive Director. (N)	202
Allergy,	
experimental allergic neuritis. Vaidya, M. C., <i>et al.</i> (A)	341
tuberculin, effect on, of earlier tuberculin tests. Narain, R., <i>et al.</i> (A)	657
American Leprosy Missions,	
19th Annual International Seminar on Leprosy meets in April 1978 at Carville. (N)	71
21st Annual International Seminar on Leprosy to meet in April 1980 at Carville. (N)	620
Amyloidosis,	
secondary, in leprosy. Sharma, S., <i>et al.</i> (A)	87
Anetoderma,	
Schweninger-Buzzi type, in Hansen's disease patients. Magarido, L. and Rotberg, A. (A)	355
Antibiotics,	
aminoglycoside, killing potential of, for <i>M. leprae</i> . Gelber, R. and Gibson, J. (A)	684
Antibody,	
activity against <i>M. leprae</i> antigen 7, in leprosy, studies on variation in content, effect on DDS treatment and BT relapse. Yoder, L., <i>et al.</i> (A)	651
anti-connective tissue, in leprosy. Fleury, R. N., <i>et al.</i> (A)	384
formation of, against <i>M. leprae</i> antigen 7, in armadillos. Harboe, M., <i>et al.</i> (A)	548
hepatitis B surface antigen, incidence of, in liver disease, blood donors, leprosy patients. Thyagarajan, S. P., <i>et al.</i> (A)	87
injection with hepatitis B virus, detection of surface antigen, by radioimmunity, in leprosy. Chiron, J. P., <i>et al.</i> (A)	532
<i>M. leprae</i> specific, detected by radioimmunoassay. Harboe, M., <i>et al.</i> (A)	84
reacting with fibroblasts, Schwann cells, and connective tissue microfibrils, in leprosy. Linder, E., <i>et al.</i> (A)	384
response in rabbits, to <i>M. bovis</i> BCG. Mshana, R. N., <i>et al.</i> (A)	543
studies, revival of interest in, in leprosy. Harboe, M. and Closs, O. (A)	372
synthesis <i>de novo</i> , effect of thalidomide on. Shannon, E. J., <i>et al.</i> (A)	381
Antigen (hepatitis),	
e-(HB _s Ag), in leprosy. Nuti, M., <i>et al.</i> (A)	330
hepatitis B, incidence of positivity, in Korean leprosy patients. Choi, S. R. and Chung, W. K. (A)	329
— surface, antibody, incidence of, in liver disease, blood donors, and leprosy patients. Thyagarajan, S. P., <i>et al.</i> (A)	87
—, in Calcutta leprosy patients, prevalence, subtypes, Chakrabarty, M. S., <i>et al.</i> (A)	641
incidence of HB _s Ag and Ag ^{“e”} /Ac anti-“e” system in hospital patients, with Hansen's disease type L. Terencio de las Aguas, J., <i>et al.</i> (A)	330
infection with hepatitis B virus, detect of surface . . . and antibody, in leprosy, by radioimmunity. Chiron, J. P., <i>et al.</i> (A)	532
persistence of Australia (Au), in leprosy. Saoji, A. M. and Mene, A. R. (A)	223
Antigen (leprosy),	
analysis of <i>M. leprae</i> . Closs, O., <i>et al.</i> (A)	374
conversion of Mitsuda negative normals into Mitsuda positive through repeated testing. Pinardi, M. E. and Convit, J. (A)	379
Dharmendra, assessment of. Sengupta U., <i>et al.</i> (A)	545
—, comparison of reactions, of leprosy patients, in normal skin and lesions. Price, J., <i>et al.</i> (A)	535
fractionation of, from <i>M. leprae</i> . Gillis, T. P. and Buchanan, T. H. (A)	674
from cultivable acid-fast bacilli from <i>M. leprae</i> , isolated from lepromatous nodules, comparative study on skin reactions to <i>M. leprae</i> -lepromin and ICRCin. Bapat, C. V. (A)	381
histocompatibility, in Iranian leprosy patients. MOHAGHEGHPUR, N., <i>et al.</i> (O)	597
HLA-DRW, in Mexican leprosy patients. Rea, T. H. and Terasaki, P. I. (A)	480
homologous and heterologous, delayed hypersensitivity skin reactions, in immunized	

guinea pigs, with <i>M. leprae</i> and four other mycobacterial strains. Mustafa, A. S. and Talwar, G. P. (A)	543
immunization of mice, with <i>M. leprae</i> . Shepard, C. C. and Minagawa, F. (A)	115
interrelationships, among selected mycobacterial species, relative to <i>M. leprae</i> , in guinea pigs, manifested by cell-mediated immunity. Shannon, E. J., <i>et al.</i> (A)	674
—, of <i>M. leprae</i> , studies on. Hastings, R. C., <i>et al.</i> (A)	112
intracytoplasmic <i>M. leprae</i> , demonstration of, in inflammatory exudate of reactional lepromatous leprosy. González-Mendoza, A., <i>et al.</i> (A)	383
lepromin induced suppressor cells, mediation by TH ₂ + T-cell subset. Mehra, V., <i>et al.</i> (A)	679
liver tissue, cross-reactions between serum proteins and, of nine-banded armadillo and man. Negassi, K., <i>et al.</i> (A)	385
Mitsuda, of animal origin, absence of hanseniasis in armadillos living in natural state, human hypersensitivity to animal Pereira, C. A. de C. and Almeida Brandao, C. B. P. (A)	388
<i>M. leprae</i> and <i>M. vaccae</i> cytoplasmic protein, delayed hypersensitivity responses to. Collins, F. M. and Morrison, N. E. (A)	375
<i>M. leprae</i> . . . 7, antibody activity against, during first year DDS treatment, in lepromatous (BL-LL) leprosy. Melsom, R., <i>et al.</i> (A)	85
—, studies on variation, effect on DDS treatment, relapse in BT leprosy. Yoder, L., <i>et al.</i> (A)	651
—, formation of antibody against, in armadillos. Harboe, M., <i>et al.</i> (A)	548
<i>M. leprae</i> specific protein, identification of, application for serodiagnosis. CALDWELL, H. D., <i>et al.</i> (A)	114
..... (O)	477
non-myelin human nerve, producing granulomatous hypersensitivity, in rabbits. Hardwicke, P. M. D. and Crawford, C. L. (A)	341
reactions, cultivated <i>M. leprae</i> and. Skinsnes, O. K. (A)	360
sensitized T-cell, proliferative response, to lepromin, Wong, J. F. (A)	676
sensory peripheral nerve as, skin lesions, granulomatous hypersensitivity, and cutaneous nerve damage induced by. Crawford, C. L. and Hardwicke, P. M. D. (A)	340
skin reactions, comparative study of, to <i>M. leprae</i> lepromin, from cultivable saprophytic mycobacteria, in leprosy patients. Sharma, R. C. and Singh, R. (A)	546
—, delayed hypersensitivity, to lepromin, prepared from four other mycobacteria. Govil, D. C. and Bhutani, L. K. (A)	540
—, observations on, induced by lepromin. Sahib, H. S. M. and Vellut, C. (A)	545
skin-reactive, of <i>M. leprae</i> . Ulrich, M., <i>et al.</i> (A)	386
soluble cytoplasmic mycobacterial, effect of, double blind trial on, on reactivity to lepromin. Haddad, N., <i>et al.</i> (A)	389
— <i>M. leprae</i> and <i>M. tuberculosis</i> , mechanisms regulating skin test responsiveness, in leprosy patients. Samuel, N. M., <i>et al.</i> (A)	385
specific leprosy, isolated by affinity chromatography, using gel immobilized lepromatous IgG as stationary phase. Reich, C. V. (A)	380
substances of <i>M. leprae</i> . Mzkin, M., <i>et al.</i> (A)	397
Antigen (miscellaneous),	
relationships among <i>M. vaccae</i> , <i>M. nonchromogenicum</i> , and <i>M. leprae</i> . Collins, F. M., <i>et al.</i> (A)	113
Argentina,	
Argentine Society of Leprosy celebrates Silver Anniversary. Hastings, R. C. (N)	618
armadillos, autochthonous, <i>M. leprae</i> inoculation into 3 species of. Balaña, L. M., <i>et al.</i> (A)	339
Armadillo (eight banded) (<i>Dasypus sabanicola</i>),	
experimental leprosy in. Convit, J., <i>et al.</i> (A)	338
histopathology of experimental leprosy in, and in nine-banded armadillos. McDougall, A. C., <i>et al.</i> (A)	343
Armadillo (nine-banded) (<i>Dasypus novemcinctus</i>),	
autochthonous, inoculation of <i>M. leprae</i> into 3 species of, in Argentina. Balaña, L. M., <i>et al.</i> (A)	339

blunders on, Lampe, D.	(A)	89
cell-mediated immunity of, effect of specific vaccine on, against, <i>M. leprae</i> . Kirchheimer, W. F., <i>et al.</i>	(A)	390
continuing saga of GSRI.	(N)	205
-derived, <i>M. leprae</i> , purified, lymphocyte response of leprosy patients to. Smelt, A. H. M., <i>et al.</i>	(A)	224
examination for mycobacteriosis. Kirchheimer, W. F.	(A)	550
— of North American, for mycobacteriosis. Sanchez, R. M. and Kirchheimer, W. F.	(A)	361
experimental animal in biomedical research.	(A)	633
— leprosy in, imported into U.K. from U.S.A. Rees, R. J. W. and Lowe, C.	(A)	338
formation of antibody against <i>M. leprae</i> antigen 7 in. Harboe, M., <i>et al.</i>	(A)	548
histopathology of experimental leprosy in, and eight banded armadillos. McDougall, A. C., <i>et al.</i>	(A)	343
indigenous leprosy in. Convit, J.	(A)	548
— Meyers, W. M.	(A)	337
— Walsh, G. P., <i>et al.</i>	(A)	342
infected, studies on <i>M. leprae</i> from. Draper, P.	(A)	357
lepromin, compared to human lepromin, double blind trail to determine late reactivity of leprosy patients and unaffected persons to different concentrations. Bechelli, L. M., <i>et al.</i>	(A)	375
—, leukocyte migration inhibition, in human lymphocytes of healthy donors. Fumarola, D. and Jirillo, E.	(A)	84
leptous and uninfected macrophages, peroxidase and acid phosphatase, electron microscopy of. McKeever, P. E., <i>et al.</i>	(A)	228
liver, mycobacterial surface protein antigens, immunochemical and structural integrity of, during separation. Caldwell, H. D. and Buchanan, T. M.	(A)	469
liver tissue antigens of, and of man, cross-reactions between serum proteins and. Negassi, K., <i>et al.</i>	(A)	385
metabolic disposition of dapsone (DDS) and rifampin (RFM) in. Murray, J. F., Jr., <i>et al.</i>	(A)	409
ocular histopathology, <i>M. leprae</i> infections in. McDougall, A. C. and Rees, R. J. W. (A)	(A)	549
quantitative aspects of experimental infection of, with <i>M. leprae</i> . Kirchheimer, W. F., <i>et al.</i>	(A)	337
serum glycoprotein studies in, experimentally infected with <i>M. leprae</i> . Harris, E. B., <i>et al.</i>	(A)	344
susceptibility of, to <i>M. leprae</i> infection. Innami, S., <i>et al.</i>	(A)	339
tissue cultures, studies on <i>M. leprae</i> . Fieldsteel, A. H., <i>et al.</i>	(A)	669
wild, leprosy-like disease in. Meyers, W. M., <i>et al.</i>	(A)	106
—, — French Acadiana, Louisiana. Smith, J. H., <i>et al.</i>	(A)	230
Art,		
fundamentals of the term "Facies Antonina." Kremer, A. and Elsler, E.	(A)	351
Arteries,		
manifestations in two leprosy cases. David-Chaussé, J., <i>et al.</i>	(A)	532
vascular changes in leprosy, arteriographic evaluation. Yadav, S. S.	(A)	87
Arthritis,		
in lepromatous Hansen's disease. Pernambuco, J. C. de A., <i>et al.</i>	(A)	353
Arthropathy,		
inflammatory, in leprosy. Alcocer, J., <i>et al.</i>	(A)	350
Arthropods,		
role of, in transmission of leprosy. Bedi, B. M. S., <i>et al.</i>	(A)	327
Asia,		
carbol fuchsin staining of mycobacteria in Southeastern . . . leprosy institutes of, and Japan. Harada, K., <i>et al.</i>	(A)	102
latent and chronic infections imported, from Southeast. Barrett-Connor, E.	(A)	74

Athymic rat,		
immunological status and infection, with <i>Mycobacterium leprae</i> in. Colston, M. J., <i>et al.</i>	(A)	679
Australia,		
no enforced segregation in. HARGRAVE, J. C.	(C)	64
Northern Territory of Australia, leprosy policy.	(A)	635
peripheral nerve biopsies in Aboriginal patients, in Northern Territory. McDougall, A. C., <i>et al.</i>	(A)	534
Autoantibodies,		
in leprosy. Masala, C., <i>et al.</i>	(A)	393
B8,		
increased frequency of, HLA and mycobacterial infection, in Japanese leprosy. Takata, H.	(A)	87
B1912,		
abortifacient activity of. MORRISON, N. E.	(C)	613
pregnant mice, effect on, fed in diet. REICH, C. V. and DE LA CRUZ, E.	(C)	612
Bacteremia,		
evaluation of, in leprosy patients. Desikan, K. V. and Sreevatsa.	(A)	359
—, —. Sreevatsa, <i>et al.</i>	(A)	536
Bacteriology,		
bacillary population, studies of uninvolved skin. Kaur, S. and Kumar, B.	(A)	222
study of a rapidly growing strain of mycobacterium. Saxena, V. K., <i>et al.</i>	(A)	545
BCG,		
delayed type hypersensitivity to, strain difference, genetic control in mice. Nakamura, R. M. and Tokunaga, F.	(A)	657
immunotherapy, study of immunity, after 3 year interval. Baranton, G., <i>et al.</i>	(A)	386
— trial of, in lepromatous leprosy. Kim, D. I.	(A)	387
infection, in an immunodeficient child, treated with transfer factor. Sharma, M. K., <i>et al.</i>	(A)	546
—, in mice, interaction of <i>M. lepraemurium</i> . Lefford, M. J.	(A)	678
lymphocyte response of leprosy patients. Smelt, A. H. M., <i>et al.</i>	(A)	224
<i>M. bovis</i> , antibody response in rabbits. Mshana, R. N., <i>et al.</i>	(A)	543
—, phagosome-lysosome fusion, cyclic adenosine 3':5'-monophosphate, in infected macrophages. Lowrie, D. B., <i>et al.</i>	(A)	649
protective efficacy of, in Burma, reasons for reduction of. Shield, M. J., <i>et al.</i>	(A)	319
soluble antigens of, crossed immunoelectrophoretic analysis, cross-reactions between mycobacteria. Harboe, M., <i>et al.</i>	(A)	540
vaccination, immunity to <i>M. leprae</i> infections, in mice. Shepard, C. C., <i>et al.</i>	(A)	90
Belgium,		
Institute of Tropical Medicine meets in Antwerp.	(N)	67
24th World Conference of the International Union against Tuberculosis meets in Brussels.	(N)	67
B-glucuronidase,		
absence of, in <i>M. leprae</i> , elevation of infected tissue enzyme. Prabhakaran, K., <i>et al.</i>	(A)	223
serum, in leprosy. Venkatesan, K., <i>et al.</i>	(A)	644
Bible,		
non-stigmatizing. Rotberg, A.	(A)	636
Biochemistry,		
comparative, infectious disease drug design. Cohen, S. S.	(A)	637
Biopsy,		
human skin, cultivation of <i>M. leprae</i> from. Scollard, D. M. and Honey, N. R.	(A)	365
<i>in vivo</i> studies, from leprosy cases, Goyle, S. and Virmani, V.	(A)	651

muscle, electromyographic recording, in lepromatous leprosy. Seville, A. and Gray, F.	(A)	552
—, routine, examination data, in leprosy. Gray, F., <i>et al.</i>	(A)	541
nerve, peripheral, diagnosis of leprosy, in Aboriginal patients. McDougall, A. C., <i>et al.</i>	(A)	534
Blastogenesis,		
T and B lymphocytes, in leprosy. Sharma, S., <i>et al.</i>	(A)	650
Blood,		
defective, mononuclear phagocyte function, in leprosy patients. ESTEVEZ, M. E., <i>et al.</i>	(O)	575
hypoalbuminemia, and dapsone. Kingham, J. G. C., <i>et al.</i>	(A)	638
Blood groups,		
ABO, and leprosy. Datar, S. V., <i>et al.</i>	(A)	532
Blood vessels,		
cutaneous, histopathological findings, in untreated lepromatous leprosy. CORUH, G. and MCDUGALL, A. C.	(O)	500
Bly, M.,		
personal.	(N)	204
Bone,		
absorption, in fingers, in leprosy, ten-year radiologic study. MacMoran, J. W. and Brand, P. W.	(A)	671
changes in the foot, etiology of, population-based study. Karat, S.	(A)	418
loss, alveolar, in leprosy, cellular basis for. Marks, S. C., Jr., and Subramaniam, K.	(A)	534
—, —, —, clinical and radiologic study, Subramaniam, K. and Marks, S. C., Jr.	(A)	536
—, extremity, cellular basis for, in leprosy. MARKS, S. C., JR.	(O)	26
Bone marrow,		
-derived macrophages, <i>in vitro</i> , growth of <i>M. lepraemurium</i> . Alexander, J. and Smith, C. C.	(A)	536
histiocytes, leprosy's footprints in. Lawrence, C. and Schreiber, A. J.	(A)	542
in tuberculoid leprosy. Koranne, R. V., <i>et al.</i>	(A)	222
Borderline leprosy (dimorphous and intermediate),		
characteristics of, in the Dominican Republic. Martinez, D. and Ricart, R.	(A)	349
development of reactions, in patients, time interval between start of anti-leprosy treatment. Naafs, B. and Wheate, H. W.	(A)	76
leprous dactylitis of all fingers in a case of. Alexander, R., <i>et al.</i>	(A)	354
nasal mucosa, significance of changes in. Chacko, C. J. G., <i>et al.</i>	(A)	538
reactions, <i>in vitro</i> lymphocyte responses in. Bjune, G. and Barnetson, R. St. C.	(A)	396
relapse, <i>M. leprae</i> antigen 7, antibody activity against, antibody content variation. Yoder, L., <i>et al.</i>	(A)	651
short course rifampin treatment of. Bourland, J. and Pattyn, S. R.	(A)	437
Brazil,		
changes in criteria for granting HD medical certificates.	(N)	619
College of Hansenology announces changes.	(N)	619
<i>Hanseniasis: Abstracts and News</i> temporarily ceases publication.	(N)	619
Phase III of prevention. Rotberg, A.	(A)	322
social aspects of leprosy in Pará State, Amazon valley. Appel, G. E.	(A)	405
unification of hanseniasis policies detailed.	(N)	619
Browne, S. G.,		
personal. Gordon G.	(N)	616
Bureau Barriere syndrome,		
and leprosy. Galli, J. J. and Vincitorio, A. G.	(A)	351
Burma,		
BCG in, reduction of protective efficacy of, reason for. Shield, M. J., <i>et al.</i>	(A)	319
reliability of dapsone self-administration, in Rangoon, in leprosy patients. Gyi, K. M., <i>et al.</i>	(A)	530

—, in Burma, —. Hagan, K. J., <i>et al.</i>	(A)	638
rifampin, efficacy and tolerability of, in Burmese lepromatous leprosy patients. Shwe, T. <i>et al.</i>	(A)	640
C3H mouse, partial inhibition of <i>M. lepraemurium</i> growth in, immunized with cell wall skeletons. TANAKA, Y.	(O)	487
Canada, 1980 World Congress of Rehabilitation International to be held in Winnipeg.	(N)	68
Le Secours aux Lépreux (Canada), Inc. presents 1978 Raoul Follereau Award to Dr. C. C. Shepard.	(N)	72
Cancer, carcinogenic activity of dapsone. Bergel, M.	(A)	410
malignant neoplasm, relation to DDS carcinogenicity, in leprosy patients. Namba, M., <i>et al.</i>	(A)	669
mutagenesis-carcinogenesis of antileprosy drugs, in animal systems, pertinence to man. Peters, J. H., <i>et al.</i>	(A)	410
squamous cell carcinoma, arising from trophic ulcers. Boopalraj, J. M. and Muthusami, T. C.	(A)	532
—, complication of plantar ulcer, in leprosy. Opromolla, D.V.A. and Fleury, R. N. ...	(A)	354
Cat leprosy, feline non-tuberculous mycobacterial skin disease resembling leprosy, experimental transmission of. Schiefer, H. B.	(A)	340
Cell(s), division, in <i>M. lepraemurium</i> , intracytoplasmic membrane systems, electron microscopic observations. HIRATA, T.	(O)	585
envelopes, of <i>M. leprae</i> and <i>M. lepraemurium</i> , comparative ultrastructure. Nguyen, T. H., <i>et al.</i>	(A)	652
-free liquid medium, cultivation trials, <i>M. leprae</i> growth, in ND-15 MT and ST medium. Nakamura, M.	(A)	104
—, —, <i>M. leprae</i> , subsequent results. Nakamura, M.	(A)	669
populations, immunosuppressive, in experimental mycobacterial infection. Bullock, W. E., <i>et al.</i>	(A)	226
responses, mononuclear-phagocyte series, in leprosy and related diseases. Ridley, M. J., <i>et al.</i>	(A)	393
suppressor, decreased activity in leprosy and other disseminated granulomatous infections. Artz, R. P., <i>et al.</i>	(A)	680
—, splenic, in <i>M. lepraemurium</i> infected mice. Bullock, W. E., <i>et al.</i>	(A)	677
T-, sensitized, lepromin, proliferative response to. Wong, J. F.	(A)	676
—, suppressor, lepromin induced. Mehra, V., <i>et al.</i>	(A)	679
—, —, production, in infected mice. Watson, S. R. and Collins, F. M.	(A)	676
Cell culture, of <i>M. leprae</i> and <i>M. lepraemurium</i> , studies on. Nomaguchi, H., <i>et al.</i>	(A)	368
Cell-mediated immunity, effect of specific vaccine on, of armadillos, against <i>M. leprae</i> . Kirchheimer, W. F., <i>et al.</i>	(A)	390
induction, in mice, to <i>M. leprae</i> . Patel, P. J. and Lefford, M. J.	(A)	90
—, to human <i>M. leprae</i> , in guinea pigs. Mehra, V. and Bloom, B. R.	(A)	111

and prothionamide, combined therapy, experimental studies on. Colston, M. J., <i>et al.</i> (A)		79
—, data on effect of, in experimental leprosy. Pattyn, S. R.	(A)	229
effect of intermittent, and in combination with dapsone, in mice. Colston, M. J. and		
Hilson, G. R. F.	(A)	411
toxic psychosis to isoniazid and, in a patient with pulmonary tuberculosis. Sharma, G.		
S., <i>et al.</i>	(A)	640
Ethiopia,		
ALERT, announcement of provisional program of courses for 1979–1980.	(N)	524
—, appoints new Executive Director, Mr. Bernt Johannessen.	(N)	202
—, holds Conference on Leprosy Training.	(N)	523
—, Kellersberger Memorial Lecture given by Dr. R. C. Hastings. Wheate, H. W.	(N)	524
dapsone-resistant leprosy in. Pearson, J. M. H., <i>et al.</i>	(A)	638
sulfone-resistant leprosy in. Haile, G. S., <i>et al.</i>	(A)	329
Etiology,		
agent, cultivation of, in leprosy.	(B)	631
lepromatous leprosy reaction, as factor in posterior lepromatous uveitis. Chovet, M.,		
<i>et al.</i>	(A)	74
of bone changes in the foot, population-based study, in leprosy. Karat, S.	(A)	418
study, of 107 cases, of granulomatous hepatitis. Vilaseca, J., <i>et al.</i>	(A)	650
Experimental leprosy,		
animal model of human disease, lepromatous disease. Storrs, E., <i>et al.</i>	(A)	230
effect of ethionamide and prothionamide in, data on. Pattyn, S. R.	(A)	229
— penicillin, on infection with <i>M. leprae</i> in mice. Delville, J., <i>et al.</i>	(A)	227
effects of ALS, on transmission of bacilli, in mice. Sushida, K.	(A)	105
establishment in nude mice. Kohsaka, K., <i>et al.</i>	(A)	228

histopathology of, in the armadillo, <i>Dasypus novemcinctus</i> and <i>Dasypus sabanicola</i> .		
McDougall, A. C., <i>et al.</i>	(A)	343
in <i>Dasypus sabanicola</i> . Convit, J., <i>et al.</i>	(A)	338
— mice, effect of ethionamide, and ethionamide and dapsone combinations in. Colston,		
M. J. and Hilson, G. R. F.	(A)	411
— nine-banded armadillos, in the U.K. Rees, R. J. W. and Lowe, C.	(A)	338
— the white-handed gibbon (<i>Hylobatus lar</i>), inoculated with leprosy bacilli of human		
origin. Waters, M. F. R., <i>et al.</i>	(A)	231
infection of armadillos with <i>M. leprae</i> , quantitative aspects of. Kirchheimer, W. F.,		
<i>et al.</i>	(A)	337
infectiousness of human leprosy bacilli in mice. Sushida, K. and Nakano, H.	(A)	342
nude mouse as a model, enhancing effect of thymus cells in infected nude mice.		
Nakamura, K. and Yogi, Y.	(A)	105
	(A)	338
ocular histopathology in <i>M. leprae</i> and <i>M. lepraemurium</i> infected mice. Hobbs, H.		
E., <i>et al.</i>	(A)	549
— infected armadillos. McDougall, A. C. and Rees, R. J. W.	(A)	549
persistence and distribution of <i>M. leprae</i> in <i>Aedes aegypti</i> and <i>Culex fatigans</i> fed on		
leprosy patients. Narayanan, E., <i>et al.</i>	(A)	232
serum glycoprotein studies in <i>M. leprae</i> infected armadillos. Harris, E. B., <i>et al.</i>	(A)	344
workshop on.	(S)	287
“Facies Antonina,”		
fundamentals of. Kremer, A. and Elsler, E.	(A)	351
Fasal, P.,		
personal.	(N)	72
Feet,		
concentration and persistence of bacilli in fingers and toes of lepromatous leprosy		
patients. Hiramalini, S., <i>et al.</i>	(A)	221
etiology of bone changes in, population-based study. Karat, S.	(A)	418
leprosy of the. Campailla, E. and Martinelli, B.	(A)	83
neuropathic, in leprosy. Vincitorio, A. G. and Galli, J. J.	(A)	449
Fetus,		
immunity in leprosy, lymphocyte responses to <i>M. leprae</i> and phytohemagglutinin, at		
birth, in mother and baby. Barnetson, R. St. C.	(A)	378
Fluorescence microscopy,		
for <i>M. leprae</i> detection, in tissue sections. JARIWALA, H. J. and KELKAR, S. S.	(O)	33
Fluorescent leprosy antibody absorption (FLA-ABS) test,		
as a screening test, for early case detection. Mitsiali, M., <i>et al.</i>	(A)	391
for detecting subclinical <i>M. leprae</i> infection. Abe, M.	(A)	379
— early serodiagnosis of leprosy. Bharadwaj, V. P. and Desikan, K. V.	(A)	391
Follereau, Raoul, Award,		
Dr. C. C. Shepard receives, for 1978.	(N)	72
	(S)	279
Follereau, Raoul, Foundations,		
celebration of 25th World Leprosy Day. Recipon, A.	(A)	401
Foot pad (mouse),		
activity of dihydrofolate reductase inhibitors, against <i>M. leprae</i> infection of. Gelber,		
R. and Levy, L.	(A)	409
effect of treatment <i>in vivo</i> with Triton WR-1339 and Macrocydon, on <i>M. leprae</i>		
infection of. Delville, J. and Jacques, P. J.	(A)	80
ICRC bacilli, growth of, in the. Bapat, C. V. and Modak, M. S.	(A)	224
—, —, strain C-44. Modak, M. S. and Bapat, C. V.	(A)	362
—, vaccine from, against <i>M. leprae</i> infection in. Bhide, M. B., <i>et al.</i>	(A)	339
	(A)	537
Footwear,		
manual for leprosy control programs. Neville, P. J.	(B)	210

Genetic control,		
in mice, strain difference of delayed-type hypersensitivity to BCG and. Nakamura, R. M. and Tokunaga, T. (A)		657
Genetic factors,		
immune deficit in patients with lepromatous leprosy. SAHA, K. and AGARWAL, S. K. (O)		1
in leprosy, study in children, in Uganda. White, S. J., <i>et al.</i> (A)		92
Genetic markers,		
and leprosy in South African Negroes, serum protein polymorphisms. Hitzeroth, H. W., <i>et al.</i> (A)		551
Genetic susceptibility,		
immunogenetic aspects of leprosy, association with major histocompatibility complex (HLA, Ch, GLO I, PGM ₂). Greiner, J., <i>et al.</i> (A)		320
investigation in the Karimui, in leprosy. Shields, E. D., <i>et al.</i> (A)		334
the NI (Neuron invasion) gene of <i>M. leprae</i> . Barksdale, L. (A)		358
to leprosy. Fine, P. E. M., <i>et al.</i> (A)		321
Germany,		
German Leprosy Relief Association (GLRA) joins in celebration of World Leprosy Day and the International Year of the Child. (N)		202
International Committee of Dermatology meets in Munich. (A)		69
Rehabilitation International announces available publications. (N)		619
Gibbon, white-handed (<i>Hylobatus lar</i>),		
experimental lepromatous leprosy in, successful inoculation with bacilli of human origin. Waters, M. F. R., <i>et al.</i> (A)		231
Glomerulonephritis,		
immune complex, in leprosy. Çöloğlu, A. S. (A)		644
Glucan (yeast),		
therapeutic effect of, in <i>M. leprae</i> infected mice. Delville, J. and Jacques, P. J. (A)		227
Glucose,		
tolerance, and serum free fatty acid levels, in leprosy. Bharadwaj, V. P., <i>et al.</i> (A)		641
Graft(s),		
human fetal thymic, transplantation, reversal reaction in patients with lepromatous leprosy after. Saha, K. (A)		223
Granuloma,		
decreased suppressor cell activity, in leprosy and other disseminated granulomatous infections. Artz, R. P., <i>et al.</i> (A)		680
<i>M. marinum</i> , in man, ultrastructure of. Marsch, W. C., <i>et al.</i> (A)		234
Granulomatosis,		
lymphomatoid, multiple neuropathy in, similarity to leprosy. Garcia, C. A. (A)		533
Greece,		
leprosy in, 1928–1977, epidemiological characteristics of last 50 years. Parisi, N. (A)		332
Guinea pig,		
cell-mediated immunity in, antigenic interrelationships among selected mycobacterial species relative to <i>M. leprae</i> as manifested by. Shannon, E. J., <i>et al.</i> (A)		674

—, —, to <i>M. leprae</i> . Mehra, V. and Bloom, B. R. (A)		649
delayed hypersensitivity responses in mice and, to <i>M. leprae</i> , <i>M. vaccae</i> , and <i>M. nonchromogenicum</i> cytoplasmic proteins. Watson, S. R., <i>et al.</i> (A)		650
immunological studies in, and in man, on bacteria and cell-free extracts of purified armadillo derived (PAD) <i>M. leprae</i> . Rees, R. J. W., <i>et al.</i> (A)		380
skin reaction to homologous and heterologous antigens in, immunized with <i>M. leprae</i> and four selected cultivable mycobacterial strains. Mustafa, A. S. and Talwar, G. P. (A)		543
Guyana,		
integrated leprosy control in. McDougall, A. C. and Rose, P. (A)		91

Gynecomastia,		
as a physical finding in normal men. Nuttall, F. Q. (A)		535
Hairless mouse (see nude mouse),		
Hand(s),		
bone absorption in fingers, ten-year radiologic study, in leprosy. MacMoran, J. W. and Brand, P. W. (A)		671
claw, reconstructive surgery of, in leprosy. Lakhan Pal, V. P., <i>et al.</i> (A)		656
concentration and persistence of bacilli in the fingers and toes of patients with lepromatous leprosy. Hiramalini, S., <i>et al.</i> (A)		221
extensor pollicis brevis transfer to flexor digitorum sublimis, four year follow up study, in leprosy. Vaidyanathan, E. P. and Anthony, P. (A)		79
infectious diseases of the. Klingmüller, G., <i>et al.</i> (B)		209
leprous dactylitis of all fingers in borderline leprosy. Alexander, R., <i>et al.</i> (A)		354
lesions in leprosy. Gomez V., M. and Rodriguez Padilla, A. (A)		450
pain, in early diagnosis of leprosy. Rimón, D., <i>et al.</i> (A)		77
partially anesthetic due to ulnar nerve in leprosy, protective value of a neurovascular island pedicle transfer in. Ranney, D. A. and Lennox, W. M. (A)		215
skeletal deformities of the denervated, in leprosy. Enna, C. D. (A)		656
Hedgehog (<i>Erinaceus europaeus</i>),		
inoculation of, with <i>M. leprae</i> . Klingmüller, G. (A)		344
Hepatitis,		
granulomatous, etiological study of 107 cases. Vilaseca, J., <i>et al.</i> (A)		650
leprous, clinico-pathologic study and therapeutic efficacy of. Pranesh Nigam, S. G. D., <i>et al.</i> (A)		217
Hepatitis B,		
infection, in leprosy, detection of surface antigen and antibody, by radioimmunology. Chiron, J. P., <i>et al.</i> (A)		532
surface antigen, and antibody, in patients with liver diseases, blood donors, and leprosy patients. Thyagarajan, S. P., <i>et al.</i> (A)		87
— (HB _s Ag), in leprosy patients, in Calcutta, prevalence and subtypes. Chakrabarty, M. S., <i>et al.</i> (A)		641
virus, immune response of leprosy patients to. Serjeantson, S. and Woodfield, D. G. (A)		86
— indicators, in leprosy. Chiron, J. P., <i>et al.</i> (A)		330
— markers, incidence of HB _s Ag and HB _e Ag, in Somalian leprosy patients. NUTI, M., <i>et al.</i> (O)		580
Hepatitis associated antigen (HAA) (see Antigen, Hepatitis),		
Hind Kusth Nivaran Sangh,		
issues annual report for 1977. (N)		69
Histamine,		
morphological changes in mast cells and levels of serotonin and, in leprosy patients. Kumar, R., <i>et al.</i> (A)		391
Histiocyte(s),		
bone marrow, leprosy's footprints in. Lawrence, C. and Schreiber, A. J. (A)		542
Histiocytosis,		
sinus, cutaneous manifestations of, with massive lymphadenopathy. Thawerani, H. (A)		78
Histology,		
and clinical evaluation of 417 suspected leprosy cases. Delpino, G. de S., <i>et al.</i> (A)		416
clinical studies, of the nose, in treated lepromatous leprosy. Barton, R. P. E., <i>et al.</i> (A)		348
contribution of, in early diagnosis of leprosy. Bianchi, O. and Cabrera, H. (A)		414
Lucio's phenomenon, comparative study. REA, T. H. and RIDLEY, D. S. (O)		161
Histopathology,		
and clinical observation in ENL. Park, J. K. and Lee, Y. S. (A)		85
aspects concerning Lucio's leprosy. Novales, J. (A)		544
documented reversal reaction in lepromatous leprosy following treatment with transfer factor. Hastings, R. C. and Job, C. K. (A)		439

findings in cutaneous blood vessels, in untreated lepromatous leprosy. CORUH, G. and MCDUGALL, A. C. (O)	500
ocular, in <i>M. leprae</i> and <i>M. lepraemurium</i> infected mice. Hobbs, H. E., <i>et al.</i> (A)	549
—, in <i>M. leprae</i> infected armadillos. McDougall, A. C. and Rees, R. J. W. (A)	549
of experimental leprosy in the armadillo. McDougall, A. C., <i>et al.</i> (A)	343
— tongue lesions, in leprosy. Mukherjee, A., <i>et al.</i> (A)	223
study of, clinically normal appearing skin in lepromatous leprosy. Bedi, T. R., <i>et al.</i> .. (A)	537
—, evolution of nasal mucosa lesions, in leprosy. Mehta, L., <i>et al.</i> (A)	416
—, liver, in leprosy. Verma, K. C., <i>et al.</i> (A)	87
—, lymph nodes, in 43 leprosy cases. Gupta, J. C., <i>et al.</i> (A)	221
tuberculoid leprosy and tuberculosis skin compared. Nirmala, V., <i>et al.</i> (A)	85
History,	
<i>Havens of Refuge</i> . Davidson, W. S. (B)	628
of leprosy in Louisiana. Gussow, Z. (A)	527
of Lucio's leprosy. Rodríguez, O. (A)	529

officers and members, list. —	686
officers, list of. (S)	243
International Year for Disabled Persons (IYDP),	
to be celebrated in 1981. (N)	525

Iran,		
children in, clinical and epidemiological study of. Assefi, V. (A)		323
histocompatibility antigens, in leprosy patients, from Azarbaijan. MOHAGHEGHPOUR, N., <i>et al.</i> (O)		597
ocular leprosy in, at Baba Baghi Leprosarium. Ramanujam, K., <i>et al.</i> (A)		215
Iron,		
serum, and total iron binding capacity, in leprosy patients. Bharadwaj, V. P., <i>et al.</i> ... (A)		219
Irradiation,		
whole body, distribution in pregnant mice of radioactivity after injection of ¹³¹ I and immunosuppressive effects. Sushida, K. and Nakano, H. (A)		231
Isolates,		
<i>in vitro</i> examination, observations of supposed contamination with another acid-fast bacillus, isolation culture. Ogawa, T. (A)		226
Isoniazid,		
and ethionamide, toxic psychosis to, in a patient with pulmonary tuberculosis. Sharma, G. S., <i>et al.</i> (A)		640
combined with prothionamide and DDS, in treatment of pulmonary tuberculosis, in adults. Orłowski, E. H. (A)		182
treatment of tuberculosis and rifampin-associated neuritis, symptomatic neuritic leprosy precipitated by rifampin and. Goodwin, C. S., <i>et al.</i> (A)		428
Isoprodian (L73A),		
combined with rifampin, in the treatment of <i>M. leprae</i> infections, in mice. Matsuo, Y., <i>et al.</i> (A)		531
Japan,		
carbol fuchsin staining of mycobacteria in leprosy institutes of, and Southeastern Asia. Harada, K., <i>et al.</i> (A)		102
Okinawa, present situation in. Saito, T. (A)		335
Kenya,		
DDS urine analysis, in leprosy patients, encouraging results of, in Wangas. Huikeshoven, H. and Bijleveld, I. (A)		75
Keratoses,		
seborrheic, with exacerbated leproma, case report. Matsumoto, T. and Sasaki, N. (A)		76
Khanolkar, V. R.,		
obituary. (Ob)		197
Korea,		
diagnosis of tuberculosis using . . . chipmunks. Bae, E. D. and Choi, T. K. (A)		552
Dr. Stanley C. Topples receives award from National Awards Foundation. (N)		71
hepatitis B antigen, positivity, in leprosy patients. Choi, S. R. and Chung, W. K. (A)		329
Latapí, F.		
personal. (S)		256
Leishmaniasis,		
experimental cutaneous, with <i>Leishmania tropica</i> , in albino hairless mice. Packchianian, A. (A)		554
Lepromatous leprosy,		
acedapsonne in the treatment of 70 patients. Samson, P. D., <i>et al.</i> (A)		435
acute infiltration reaction (Tajiri) in, studies of clinical course and prognosis during chemotherapy. Takizawa, H. (A)		78
and arthritis. Pernambuco, J. C. de A., <i>et al.</i> (A)		353
— onchocerciasis. Prost, A., <i>et al.</i> (A)		654
animal model of human disease. Storrs, E., <i>et al.</i> (A)		230
antibody activity against <i>M. leprae</i> antigen 7 during first year DDS treatment. Melsom, R., <i>et al.</i> (A)		85
BCG immunotherapy trial in. Kim, D. I. (A)		387
chemotaxis in. Azulay, R. D., <i>et al.</i> (A)		345
circulating anticoagulant in. COLE, F. S., <i>et al.</i> (O)		121

clinical and histological studies of the nose in treated. Barton, R. P. E., <i>et al.</i>	(A)	348
— trial of rifampin in. Babu, N. V.	(A)	444
clinically normal appearing skin in, histopathologic study. Bedi, T. R., <i>et al.</i>	(A)	537
combination rifampin-levamisole in a double-blind trial in treatment. Liturri, M. and Wilkinson, F.	(A)	442
concentration and persistence of bacilli in fingers and toes of patients with. Hiramalini, S.	(A)	221
culture of leprosy bacillin <i>in vitro</i> in a case of. Massalski, W. K.	(A)	225
demonstration of <i>M. leprae</i> in tissues from bacteriologically negative treated patients. Krieg, R. E. and Myers, W. M.	(A)	367
discharge of <i>M. leprae</i> from the mouth in patients. Hubscher, S., <i>et al.</i>	(A)	222
early and late reactions in patients with lepromins from <i>M. leprae</i> and five selected cultivable mycobacteria. Mustafa, A. S. and Talwar, G. P.	(A)	543
effect of tubercin-3 on serum electrophoretic patterns in. Byun, S. Y. and Chung, T. H.	(A)	538
efficacy and tolerability of rifampin in Burmese patients with. Shwe, T.	(A)	640
electromyographic recording and muscle biopsy in. Seville, A. and Gray, F.	(A)	552
electronmicroscopical studies of <i>M. leprae</i> during breakdown in human tissue. Bourges, M.	(A)	364
evaluation of treatment of patients in The Netherlands. Faber, W. R. and Leiker, D.	(A)	637
experimental, in the white-handed gibbon (<i>Hylobatus lar</i>), successful inoculation with leprosy bacilli of human origin. Waters, M. F. R., <i>et al.</i>	(A)	231
—, nude mouse as model, enhancing effect of thymus cells in. Nakamura, K. and Yogi, Y.	(A)	105
favorable effect of clofazimine in. Cottenot, F. and Pennec, J.	(A)	80
four-weekly "pulse" therapy with rifampin in sulfone-resistant. Laing, A. B. G.	(A)	437
gut-associated IgA deficiency in. Saha, K., <i>et al.</i>	(A)	545
histoid nodules in. Saúl, A. and Payro, E.	(A)	351
histopathologically documented reversal reaction following treatment with transfer factor. Hastings, R. C. and Job, C. K.	(A)	439
humoral and cellular immunity in. Meneghini, C., <i>et al.</i>	(A)	382
immune deficit in patients, nature and relation to genetic factors, spectrum, and duration of illness. SAHA, K. and AGARWAL, S. K.	(O)	1
immunological findings in. Iler, Ö., <i>et al.</i>	(A)	378
— status of patients, assessment. Pervukhin, Yu. V., <i>et al.</i>	(A)	378
immunomodulatory action of two drugs given together in bacilliferous. Sasiain, M. C. <i>et al.</i>	(A)	442
immunopathologic observations in long-term BI negative patients. Koseki, M., <i>et al.</i> ..	(A)	115
introductory rifampin therapy in, six month follow-up study. Girdhar, B. K., <i>et al.</i>	(A)	529
<i>in vitro</i> lymphoproliferative response, to <i>M. leprae</i> , in normal siblings of patients. Stoner, G. L., <i>et al.</i>	(A)	374
—, —, of HLA-D-identical siblings of patients. Stoner, G. L., <i>et al.</i>	(A)	546
— modulation of lymphocyte responses to photohemagglutinin by plasma, increased in babies of affected mothers at time of birth. Bjune, G., <i>et al.</i>	(A)	538
<i>in vivo</i> response of mast cells to serum. Kumar, R., <i>et al.</i>	(A)	542
long-term sulfone therapy with special reference to renal abnormalities and frequency of drug resistance. Terencio de las Aguas, J.	(A)	433
Lucio's phenomenon and diffuse nonnodular. Rea, T. H. and Levan, N. E.	(A)	77
masquerading as disseminated tuberculosis. Weissman, J. B. and Neu, H. C.	(A)	644
methods of stimulating cell-mediated immunity in cases, clinical, bacteriological, and histopathological study with immunological control. Saint-André, P., <i>et al.</i>	(A)	376
MIF response to lepromin, PPD, and SK-SD in patients and healthy individuals. Castro-Mussot, M. E., <i>et al.</i>	(A)	380
<i>M. avium</i> skin infection resembling. Cole, G. W. and Gebhard, J.	(A)	641
neutrophil activation, in adjuvant disease, implications for reactional. Convit, J., <i>et</i> <i>al.</i>	(A)	382
—, significance in reactional, <i>in vivo</i> and <i>in vitro</i> effects of thalidomide. Goihman- Yahr, M., <i>et al.</i>	(A)	220
persistence and drug resistance of <i>M. leprae</i> , obstacles to successful chemotherapy of. Levy, L.	(A)	408

pharmacological considerations of drug combinations for treatment. Ellard, G. A. (A)	408
phospholipid composition of leukocytes in. Kalofoutis, A., <i>et al.</i> (A)	420
placebo-controlled clinical trial of transfer factor in. Faber, W. R., <i>et al.</i> (A)	439
posterior . . . uveitis, reaction as an etiologic factor. Chovet, M., <i>et al.</i> (A)	74
reactional, demonstration of intracytoplasmic <i>M. leprae</i> antigen in inflammatory exudate. González-Mendoza, A., <i>et al.</i> (A)	383
relapse in. Sanada, K., <i>et al.</i> (A)	419
remnants of quiescent leprosy bacilli in deep organs of patients, improved acid-fast staining method. Sasaki, N. and Kawatsu, K. (A)	419
results of immunotherapy in patients. Nozarov, K. I. and Gnenyuck, T. S. (A)	438
reversal reactions, following transfer factor therapy. Hastings, R. C. and Job, C. K. . . (A)	221
—, in patients, after transplantation of human fetal thymic grafts. Saha, K., <i>et al.</i> (A)	223
rifampin, for treatment. Jacobson, R. R. (A)	682
—, in treatment. Gatti, J. C., <i>et al.</i> (A)	436
—, nine years' experience. Waters, M. F. R., <i>et al.</i> (A)	83
sequential biochemical investigations in. Venkatesan, K. and Bharadwaj, V. P. (A)	224
statistical analysis of two chemotherapy trials, interactions among patient variables. U. S. Leprosy Panel. (A)	219
—, response to therapy measured by inoculation of mice. U.S. Leprosy Panel. (A)	218
therapeutic effects of adding rimactane [®] (rifampin) 450 mg daily or 1200 mg once monthly in a single dose to dapsone 50 mg daily in patients. LANGUILLON, J., <i>et al.</i> (O)	37
..... (A)	436
treatment with long-acting sulfonamides. Schulz, E. J. and Kok, S. H. (A)	440
— with clofazimine (B663 Lamprene). Venkatesan, T. V. (A)	82
tuberculoïd relapse in. Waters, M. F. R. and Ridley, D. S. (A)	350
ultrastructure of, morphological analysis of development of therapeutics. Wilkinson, F. F., <i>et al.</i> (A)	364
untreated, histopathological findings in cutaneous blood vessels. CORUH, G. and McDougall, A. C. (O)	500
Lepromin,	
armadillo, leukocyte migration inhibition, in human lymphocytes of healthy donors. Fumarola, D. and Jirillo, E. (A)	84
comparative study on skin reactions to <i>M. leprae</i> -, and to ICRCin, antigen from cultivable acid-fast bacilli isolated from lepromatous nodules. Bapat, C. V. (A)	381
delayed hypersensitivity skin reactions to, and antigens from four other mycobacteria. Govil, D. C. and Bhutani, L. K. (A)	540
—, prepared from <i>M. leprae</i> and selected cultivable mycobacteria. Hogerzeil, L. M. and Prabhudass, N. (A)	541
double blind trial, effect of certain soluble cytoplasmic mycobacterial antigens on reactivity. Haddad, N., <i>et al.</i> (A)	387
-induced suppressor cells in patients, evidence for mediation by TH ₂ ⁺ T-cell subset. Mehra, V., <i>et al.</i> (A)	679
lymphocyte transformation test (LTT) in patients, in presence of phytohemagglutinin, . . . , and <i>M. leprae</i> , in culture medium with normal homologous serum. Pagnano, P. M. G., <i>et al.</i> (A)	389
MIF response to, PPD and SK-SD in patients and healthy individuals. Castro-Mussot, M. E., <i>et al.</i> (A)	380
Mitsuda-type reactions, host resistance in <i>M. lepraemurium</i> infection. Curtis, J. and Turk, J. L. (A)	652
<i>M. leprae</i> -, and antigens from cultivable saprophytic mycobacteria, comparative study of skin reactions in patients. Sharma, R. C. and Singh, R. (A)	546
test results using human . . . (H) and armadillo . . . A. Tarabini, G., <i>et al.</i> (A)	389
Leprosy,	
A Window On. Chatterjee, B. R. (B)	206
absorption in fingers in, ten-year radiologic study. MacMoran, J. W. and Brand, P. W. (A)	671
action of 2-mercapto-propionil glycine on. Wilkinson, F. and Gervaci, V. S. (A)	440

an overview. Browne, S. G. (A)	635
and ABO blood groups. Datar, S. V., <i>et al.</i> (A)	532
— acro-osteolysis. Molerés, R. and Enna, C. D. (A)	422
— anemia. Verma, K. C., <i>et al.</i> (A)	216
— eczema. Ghosh, S., <i>et al.</i> (A)	352
— genetic markers, in South African Negroes, serum protein polymorphisms. Hitzeroth, H. W., <i>et al.</i> (A)	551
— HLA, in Chinese. Chan, S. H., <i>et al.</i> (A)	641
— hand lesions. Gomez V., M. and Rodriguez Padilla, A. (A)	450
— lower limb angiography. Johnson, A. C., <i>et al.</i> (A)	84
— pregnancy. Maurus, J. (A)	214
— psoriasis, in light of common history. Eckes, L. K. (A)	527
— renal dysfunction. Mohanty, H. (A)	418
— respiratory system involvement. KAUR, S., <i>et al.</i> (O)	18
— scalp alopecia. Fragueta Rangel, J. V., <i>et al.</i> (A)	533
— the Bureau Barriere syndrome. Galli, J. J. and Vincitorio, A. G. (A)	351
— the rheumatoid factor. Ellis, B. P. B. (A)	351
— therapy. Noussitou, F. (A)	432
— water and sewage. (N)	68
antibodies reacting with fibroblasts, Schwann cells, and connective tissue microfibrils in. Lindner, E., <i>et al.</i> (A)	384
anticonnective tissue antibodies in. Fleury, R. N., <i>et al.</i> (A)	384
articular manifestations in two cases. David-Chaussé, J., <i>et al.</i> (A)	532
associated cases in the families of school children with. Ganapati, R., <i>et al.</i> (A)	91
association with pulmonary tuberculosis. Nigam, P., <i>et al.</i> (A)	534
autoantibodies in. Masala, C., <i>et al.</i> (A)	393
cellular basis for extremity bone loss in. MARKS, S. C., JR. (O)	26
changes in the skull. Møller-Christensen, V. (B)	210
chemotherapy of, with nude mice. Kohsaka, K., <i>et al.</i> (A)	673
classification, three instructive cases. Jopling, W. H. and Ridley, D. S. (A)	415
clinical and biochemical aspects. Ryzhova, N. Ya. (A)	417
— and histological evaluation of 417 suspected cases. Delpino, G. de S. (A)	416
— spectrum of leprosy. Opromolla, D. V. A. and Fleury, R. N. (A)	416
clinico-pathological aspects. Convit, J., <i>et al.</i> (A)	415
comes of age. FITE, G. L. and FASAL, P. (E)	607
complications of. Karat, A. B. A. (A)	533
compression neuropathy of the radial nerve in. Charosky, C., <i>et al.</i> (A)	450
coronary heart disease in. Diamantopoulos, E., <i>et al.</i> (A)	419
current societal attitudes, changing role of National Leprosy Control Centre, Sungei Buloh, Malaysia. Kandiah, N., <i>et al.</i> (A)	213
dapsone as a chemoprophylactic, value of. Noordeen, S. K. and Neelan, P. N. (A)	320
default among patients, observations in. Bhagoliwal, A., <i>et al.</i> (A)	531
determination of T and B lymphocytes, in patients with different types of. Padierna, J., <i>et al.</i> (A)	383
development of Hodgkin's disease in a patient. Weshler, Z., <i>et al.</i> (A)	536
— of vaccine, introduction. Talwar, G. P. (A)	547
dinitrochlorobenzene responsivity throughout the granulomatous spectrum of. Rea, T. H. and Levan, N. E. (A)	389
effect of . . . in mothers on their children, before and after birth. Duncan, M. E. (A)	350
elective surgical decompression of nerves in, technics and results. Pandya, N. J. and Antia, N. H. (A)	76
electron microscopy of. Okada, S. (A)	665
electrophysiological evidence for motor unit impairment during. Seville, A. (A)	428
endemic, ancestral immunity in the evolution of, in tropical zones. Aguiar Pupo, J. de (A)	393
etiology of bone changes in the foot, population-based study. Karat, S. (A)	418
evaluation of male gonadal function in. Dash, R. J., <i>et al.</i> (A)	532
experimental model for, new. Soto, J., <i>et al.</i> (A)	363
extensor pollicis brevis transfer to flexor digitorum sublimis in, four-year follow-up study. Vaidyanathan, E. P. and Anthony, P. (A)	79
FLA-ABS test, to screen for case detection at an early stage. Mitsiali, M., <i>et al.</i> (A)	391

fluorescent leprosy antibody absorption (FLA-ABS) test for early serodiagnosis.	
Bharadwaj, V. P. and Desikan, K. V. (A)	391
found in a dermatology clinic in Taiwan. Li, W. M. and Wong, C. K. (A)	76
genetics of susceptibility to. Fine, P. E. M., <i>et al.</i> (A)	321
greater auricular nerve in diagnosis of. Lynch, P. (A)	534
Guide to . . . and to Control. Kapoor, P. (B)	208
HLA-DRW antigens in Mexican patients with. Rea, T. H. and Terasaki, P. I. (A)	680
Handbook of. Jopling, W. H. (B)	208
has, come of age? ACKLEY, R. K. (E)	608
hematologic profile in, related to severity of disease and treatment. Karat, A. B. A.	
and Rao, P. S. S. (A)	214
histology, contribution of, in early diagnosis. Bianchi, O. and Cabrera, H. (A)	414
immunological profile of patients, resident in a hospital, with different types of.	
Estrada-Parra, S. (A)	394
— studies in patients in reaction treated with thalidomide. Rodríguez-Padilla, C. (A)	396
immunology of, WHO Special Programme. Godal, T. (A)	372
in a chimpanzee, morphology of skin lesions, characterization of the organism.	
Leininger, J. R., <i>et al.</i> (A)	550
— Literature. Contreras Duenas, F. (B)	207
— primary health care. González Galvan, A. (A)	320
— the United States. Enna, C. D., <i>et al.</i> (A)	232
(A)	332
<i>in vitro</i> electrophysiological, light and electronmicroscopical studies, in neuropathy,	
correlations. Pandya, S. S., <i>et al.</i> (A)	430
indigenous, in armadillos. Walsh, G. P., <i>et al.</i> (A)	342
—, in the armadillo. Convit, J. (A)	548
infectious and immunological disorder of the nervous system. Dastur, D. K. (A)	645
infectiousness of human bacilli in mice. Sushida, K. and Nakano, H. (A)	342
inflammatory arthropathy in. Alcocer, J., <i>et al.</i> (A)	350
involvement of cranial nerves in, with reference to treatment. Namba, M. and	
Kobayashi, S. (A)	428
Leprosy. (A)	232
—, Kirchheimer, W. F. (A)	528
lipid staining in classification, importance of. Garriso Neves, R. and Azulay, R. D. (A)	420
micro-technique enzyme-linked immuno-sorbent assay, of Clq-reactive circulating	
immune complexes in. Stek, M. (A)	392
microbial persistence in. Waters, M. F. R., <i>et al.</i> (A)	432
microbiology of, reflections on. Delville, J. (A)	548
motor nerve conduction velocity in, correlation with clinical and histological findings.	
Chopra, J. S., <i>et al.</i> (A)	427
nerve, changes in. Klingmüller, G. (A)	84
—, damage in, prospects for study and applications for therapy. Pearson, J. M. H. (A)	426
—, —, quantitative study. Ramchandra Bhat, K., <i>et al.</i> (A)	341
—, function in, assessment of. Naafs, B. and van Droogenbroeck, J. B. A. (A)	427
—, lesions in, evolution of. Antia, N. H., <i>et al.</i> (A)	427
—, surgery in. van Droogenbroeck, J. B. A. and Naafs, B. (A)	452
nervous system in. Dastur, D. K. (A)	646
neuropathy in, results of surgical treatment. Ganopol, J., <i>et al.</i> (A)	452
non-lepromatous, maintenance therapy in. Vellut, C., <i>et al.</i> (A)	432
notes on the history of, in Louisiana. Gussow, Z. (A)	527
pathology of. Ridley, D. S. (A)	636
peripheral nerve biopsies in diagnosis of, in Aboriginal patients, from Northern	
Territory of Australia. McDougall, A. C., <i>et al.</i> (A)	534
— vascular deficit in, role in pathogenesis of neuropathy. Kaur, S., <i>et al.</i> (A)	429
policy. Northern Territory Department of Health (Australia). (A)	635
practical experience with combined therapy in. Rosenfeld, M., <i>et al.</i> (A)	434
prevention of disability in patients with. Arvelo, J. J. (A)	447
primary care of patients. Monzon, H. and Rassi, E. (A)	528
— involvement of nasal mucosa, in apparently healthy contacts of patients. Chacko,	
C. J. G., <i>et al.</i> (A)	417

prognostic considerations, study of 38 patients, submitted to Mitsuda tests 23 to 35 years previously. Alchorne, M. M. A., <i>et al.</i>	(A)	388
prothionamide, results of treatment with. Bragina, V. S.	(A)	437
proven dapsone-resistant, in Cebu, Philippines, study of. Fajardo, T. T. and Abalos, R. M.	(A)	415
pseudocholinesterase types, distribution of, in patients with. Navarrete, J. I., <i>et al.</i> ...	(A)	344
rational chemotherapy of. Prabhakaran, K., <i>et al.</i>	(A)	359
reaction and levamisole (R12564). Cardarma, J. E., <i>et al.</i>	(A)	440
rehabilitation, medical and socio-economic, in Cuban patients. Werthein, L. J., <i>et al.</i> (A)	(A)	447
-related and non-related families, comparative serum profile in. Quesada-Pascual, F., <i>et al.</i>	(A)	394
renal changes, clinical, bacteriological, histological, and functional appraisal. Thomas, A., <i>et al.</i>	(A)	421
— damage in. Loginov, V. K. and Sluvko, Z. A.	(A)	350
research in.	(A)	636
—, rehabilitation, social and medical. Mehta, J. M. and Gokhale, S. W.	(B)	209
respiratory system in, involvement of. KAUR, S., <i>et al.</i>	(O)	18
—, —. Kumar, B., <i>et al.</i>	(A)	349
revival of interest in antibody studies in. Harboe, M. and Closs, O.	(A)	372
Schweninger-Buzzi type of anetoderma in patients. Margarido, L. and Rotberg, A. ...	(A)	355
secondary bacterial infections in chronic trophic ulcers in. Chow, S. K. W.	(A)	370
segmental demyelination in human and mouse model, assessed by teased fiber technique, electrophysiological correlation. Shetty, V. P., <i>et al.</i>	(A)	429
serum beta-glucuronidase in. Venkatesan, K., <i>et al.</i>	(A)	644
— calcium and magnesium, in different types of. Sinha, S. N., <i>et al.</i>	(A)	224
— immunoglobulins in. Kelkar, S. S., <i>et al.</i>	(A)	642
skeletal deformities of the denervated hand in. Enna, C. D.	(A)	656
Some Facts About. Dharmendra.	(B)	628
squamous cell carcinoma, complication of plantar ulcer in. Opromolla, D. V. A. and Fleury, R. N.	(A)	354
sulfone-resistant, case communication. Vega-Nunez, J.	(A)	444
—, in Ethiopia. Haile, G. S., <i>et al.</i>	(A)	329
—, prevention of. Pearson, J. M. H., <i>et al.</i>	(A)	328
—, treatment of. Jacobson, R. R.	(A)	433
superficial peroneal nerve thickening, early diagnostic sign in. Vaidyanathan, E. P. and Vaidyanathan, S. I.	(A)	79
suppressor cells in. Nath, I., <i>et al.</i>	(A)	391
surgery, role in rehabilitation in. Antia, N. H.	(A)	446
surgical treatment of ulnar nerve paralysis in. Palande, D. D.	(A)	451
<i>The Book of Outlines.</i> Hasan, S.	(B)	207
The Challenge of. Jagadisan, T. N.	(B)	207
the Marchoux Institute, center for research and care of persons with. Pelletier, P.	(A)	636
today. Jopling, W. H.	(A)	213
treatment defaulters in, retrospective study of 42,000 cases. KOTICHA, K. K. and NAIR, P. R. R.	(O)	50
ultrastructural changes, in blood vessels of peripheral nerves and skin of patients. Boddington, J., <i>et al.</i>	(A)	430
ultrastructure, of beginning and progressive nerve involvement, in patients. Boddington, J.	(A)	425
untreated, Saidapet story, nineteen year follow-up of children. Ramanujam, K.	(A)	347
use of information, to evaluate vaccination trial, besides incidence rates. Irgens, L. M., <i>et al.</i>	(A)	319
when to think of? Basset, A.	(A)	635
with Waardenburg's syndrome. Reddy, B. S. N., <i>et al.</i>	(A)	77
Leprosy Mission,		
sponsors seminars in Africa.	(N)	66
Lesion(s),		
cerebrovascular, frequency of, in leprosaria. Furuta, M., <i>et al.</i>	(A)	214
comparison of reaction to Dharmendra antigen in normal skin and, in leprosy patients. Price, J., <i>et al.</i>	(A)	535

direct and indirect immunofluorescent studies of. Saylan, T., <i>et al.</i>	(A)	392
early. Cardama, J. E.	(A)	347
hand, in leprosy. Gomez V., M. and Rodríguez Padilla, A.	(A)	450
immunological relatedness of ribosomes from mycobacteria, nocardiae, corynebacteria, and microorganisms in leprosy. Laub, R., <i>et al.</i>	(A)	542
leprous skin, periodic acid-carbol pararosanilin stain and acid-methenamine silver stain, to stain leprosy bacilli in. Harada K. and Kasai, T.	(A)	366
nasal mucosa, evolution of, histopathological study. Mehta, L., <i>et al.</i>	(A)	416
nerve, evolution of, in leprosy. Antia, N. H., <i>et al.</i>	(A)	427
skin, granulomatous hypersensitivity and cutaneous nerve damage, induced by sensory peripheral nerve as antigen. Crawford, C. L. and Hardwicke, P. M. D.	(A)	340
—, morphology of, in a chimpanzee, Leininger, J. R., <i>et al.</i>	(A)	550
tongue, histopathology of, in leprosy. Mukherjee, A., <i>et al.</i>	(A)	223
Leucine,		
stimulating effect of, on <i>M. leprae</i> growth. Murohashi, T. and Yoshida, K.	(A)	226
Leukocyte(s),		
migration inhibition, analogous to <i>M. leprae</i> , five cultivable mycobacterial strains giving blast transformation and. Mustafa, A. S. and Talwar, G. P.	(A)	544
—, with armadillo lepromin, in human lymphocytes of healthy donors. Fumarola, D. and Jirillo, E.	(A)	84
peripheral blood, endocytic ability of, measured by capacity to ingest <i>M.</i> <i>lepraemurium</i> <i>in vitro</i> . Rojas-Espinosa, O. and Aponte-Vazquez, J.	(A)	422
phospholipid composition, in lepromatous leprosy. Kalofoutis, A., <i>et al.</i>	(A)	420
polymorphonuclear, interaction of <i>M. microti</i> and <i>M. lepraemurium</i> with mouse. Smith, C. C., <i>et al.</i>	(A)	658
Leukotaxis,		
defective, in monocytes from patients with pulmonary tuberculosis. Campbell, P. R. ..	(A)	552
Levamisole,		
and tetramisole, therapeutic trial with immunomodulators, in leprosy. Carvalho, J. C. de S., <i>et al.</i>	(A)	441
combined with rifampin, double-blind trial of treatment of lepromatous leprosy. Liturri, M. and Wilkinson, F.	(A)	442
(R12564) and leprosy reaction. Cardama, J. E., <i>et al.</i>	(A)	440
Lewis rats,		
neonatally thymectomized (NTLR), combined dapsone-rifampin therapy in, chronically infected with <i>M. leprae</i> . Fieldsteel, A. H. and Levy, L.	(A)	108
—, infected with <i>M. leprae</i> , histopathologic and electron microscopic observations. Dawson, P. J., <i>et al.</i>	(O)	561
Light microscopy,		
correlations, of <i>in vitro</i> electrophysiological, . . . , and electronmicroscopical studies, in neuropathy of leprosy. Pandya, S. S., <i>et al.</i>	(A)	430
Lipid(s),		
staining, importance of, in classification. Garriso Neves, R. and Azulay, R. D.	(A)	420
Literature,		
Leprosy in. Contreras Duenas, F.	(B)	207
<i>The Chronicles of Thomas Covenant the Unbeliever</i> . Donaldson, S. R.	(B)	629
Liver,		
armadillo, tissue, immunochemical and structural integrity of surface protein antigens of mycobacteria during separation from. CALDWELL, H. D., <i>et al.</i>	(O)	469
diseases, incidence of hepatitis B surface antigen and antibody in patients with. Thyagarajan, S., <i>et al.</i>	(A)	87
histopathologic study of, in leprosy. Verma, K. C., <i>et al.</i>	(A)	87
involvement of, in leprosy reactions. Tolentino, M. M., <i>et al.</i>	(A)	353
Lucio's leprosy,		
—, Castro, E. and Novales, J.	(A)	414
epidemiology and therapy. Saúl, A.	(A)	551

histopathological aspects. Novales, J. (A)	544
history and concepts. Rodríguez, O. (A)	529
immunological profile. Estrada-Parra, S., <i>et al.</i> (A)	539
laboratory and theoretical clinical aspects. Ortiz, Y. and Giner, M. (A)	535
Lucio's phenomenon,	
an overview. Rea, T. H. (A)	643
and diffuse nonnodular lepromatous leprosy. Rea, T. H. and Levan, N. E. (A)	77
comparative histological study. REA, T. H. and RIDLEY, D. S. (O)	161
<i>Dermatologia Revista Mexicana</i> devotes issue to. (N)	524
in tuberculoid leprosy. Miranda, R. N. (A)	418
Lymph node(s),	
draining, enlargement of, by four selected cultivable strains of mycobacteria. Mustafa, A. S. and Talwar, G. P. (A)	544
histopathologic study in 43 cases, in leprosy. Gupta, J. C., <i>et al.</i> (A)	221
Lymphocyte(s)	
ability of <i>M. leprae</i> , <i>M. w.</i> and ICRC bacillus to produce macrophage activating factors from, of leprosy patients. Prasad, H. K., <i>et al.</i> (A)	544
allogeneic, transfusion of, inactivated with mitomycin C, passive transfer to patients by transfusion of. Saha, K., <i>et al.</i> (A)	86
function in progressive <i>M. lepraemurium</i> infection. Banerjee, D. K. (A)	385
human, of healthy donors, leukocyte migration inhibition with armadillo lepromin in. Fumarola, D. and Jirillo, E. (A)	84
responses, <i>in vitro</i> , in borderline leprosy reactions. Bjune, G. and Barnetson, R. St. C. (A)	396
—, to <i>M. leprae</i> and phytohemagglutinin, in mother and baby, at birth. Barnetson, R. St. C., <i>et al.</i> (A)	378
—, to phytohemagglutinin, by plasma, in mother and baby, at birth. Bjune, G., <i>et al.</i> (A)	538
splenic suppressor cell populations in <i>M. lepraemurium</i> infected mice, cell mediated lymphocytotoxic activity. Bullock, W. E., <i>et al.</i> (A)	677
surface markers on, and cells of mononuclear phagocyte series, in skin sections of leprosy. Ridley, M. J., <i>et al.</i> (A)	86
T, alteration of subpopulations of, immunoregulation in infection caused by <i>M. tuberculosis</i> , presence of suppressor monocytes. Katz, P., <i>et al.</i> (A)	657
T and B, and blastogenesis, in leprosy. Sharma, S., <i>et al.</i> (A)	650
—, determination of, in patients with different types of leprosy. Padierna, J., <i>et al.</i> (A)	383
Lymphocyte transformation,	
cultures, phytohemagglutinin (PHA)-induced, <i>in vivo</i> effect of DDS on, in normal healthy volunteers. SENGUPTA, U., <i>et al.</i> (O)	167
test, in healthy contacts of leprosy patients, influence of consanguinity with the patient, sex, and age. MENZEL, S., <i>et al.</i> (O)	153
—, —, influence of household exposure. MENZEL, S. (O)	138
(A)	374
—, decreased lymphocyte reactivity to <i>M. leprae</i> in lepromatous leprosy, no evidence of generalized impairment. Faber, W. R., <i>et al.</i> (A)	539
—, presence of phytohemagglutinin, lepromin, and <i>M. leprae</i> , in culture medium with normal homologous serum. Pagnano, P. M. G., <i>et al.</i> (A)	389
Lysosome(s),	
phagosome-, fusion, and cyclic adenosine 3':5'-monophosphate, in <i>M. microti</i> , <i>M. bovis</i> BCG, or <i>M. lepraemurium</i> infected macrophages. Lowrie, D. B., <i>et al.</i> (A)	649
—, —, in cultured macrophages, <i>M. lepraemurium</i> as ingested organism, effects of anionic inhibitors of. Draper, P., <i>et al.</i> (A)	653
Lysozyme,	
serum amyloid protein SAA, C-reactive protein and, in leprosy, SCHEINBERG, M. A., <i>et al.</i> (O)	133
McDougall, A. C.,	
personal. Browne, S. G. (N)	68

Macrocydon,		
and Triton WR-1339, effect of treatment <i>in vivo</i> with, on <i>M. leprae</i> mouse foot pad infection. Deville, J. and Jacques, P. J. (A)		80
Macrophage(s),		
ability of <i>M. leprae</i> , <i>M. w.</i> and ICRC bacillus to produce . . . activating factors, from lymphocytes of leprosy patients. Prasad, H. K., <i>et al.</i> (A)		544
activated, scanning electron microscopic studies of, in the mouse. Nabarra, B., <i>et al.</i> (A)		229
armadillo, leprosy and uninfected, peroxidase and acid phosphatase, electron microscopy of. McKeever, P. E., <i>et al.</i> (A)		228
cultured, effect of anionic inhibitors of phagosome-lysosome fusion in, <i>M. lepraemurium</i> as ingested organism. Draper, P., <i>et al.</i> (A)		653
diffusion chamber cultures, comparative effects of sulfones and rifampin on <i>M. lepraemurium</i> growth in. Rightsel, W. A., <i>et al.</i> (A)		218
infected with <i>M. microti</i> , <i>M. bovis</i> BCG, or <i>M. lepraemurium</i> , phagosome-lysosome fusion and cyclic adenosine 3':5'-monophosphate in. Lowrie, D. B., <i>et al.</i> (A)		649
interaction between <i>M. fortuitum</i> and, from mouse peritoneal exudate, concerning intracellular ecology. Chu, C. Y. (A)		553
lysozyme in, immunohistochemical observation of, in leprosy. Yamashita, K., <i>et al.</i> .. (A)		547
-mediated immunity, in <i>M. lepraemurium</i> infection, serum from infected mice suppresses. Preston, P. M. (A)		653
non-stimulated and stimulated mouse peritoneal-derived and bone marrow-derived, <i>in vitro</i> , growth of <i>M. lepraemurium</i> in. Alexander, J. and Smith, C. C. (A)		536
of nude mice, figures of multiplication of acid-fast bacilli in, electron microscope findings. Fukunishi, Y., <i>et al.</i> (A)		668
role of, in lymphoproliferative response, to <i>M. leprae</i> , <i>in vitro</i> . Hirschberg, H. (A)		649
——, studied by protein synthesis, resistant and susceptible mouse and human hosts, in leprosy. Birdi, T. J., <i>et al.</i> (A)		537
systemic activation in <i>M. leprae</i> immunized mice. Patel, P. J. (A)		679
Malawi,		
dermatological clinic, leprosy control scheme in, ten years' experience. Rampen, F. (A)		92
Malaysia,		
societal attitudes towards leprosy, changing role of the National Leprosy Control Centre, Sungei Buloh. Kandiah, N., <i>et al.</i> (A)		213
Mali,		
Marchoux Institute, Bamako, center for research and patient care. Pelletier, P. (A)		636
twenty years of surgery at the Marchoux Institute, Bamako. Bourrel, P., <i>et al.</i> (A)		449
Malta,		
leprosy eradication project in, 6 year report. Depasquale, G. and Bonnici, E. (A)		332
Mast cells,		
<i>in vivo</i> response of, to lepromatous serum. Kumar, R., <i>et al.</i> (A)		542
morphological changes in, and levels of serotonin and histamine, in leprosy patients. Kumar, R., <i>et al.</i> (A)		391
Medical ethics,		
Council for International Organizations of Medical Sciences (CIOMS) holds conference on medical experimentation and human rights, in Portugal. (N)		71
Medication monitor,		
potential uses in treatment of leprosy. MOULDING, T. S. (O)		601
Mehta, J. N.,		
obituary. (Ob)		197
Mental illness,		
mental state of leprosy patients. Campos, F. J., <i>et al.</i> (A)		403
psychological rehabilitation of leprosy patients using group dynamics. Avila, J. J., <i>et al.</i> (A)		403
Mercado, R.,		
personal. (N)		203

Mexico,

Dermatologia Revista Mexicana devotes August 1978 (Vol. 22, No. 2) issue to

Lucio's leprosy. (N)	524
XI International Leprosy Congress, held in Mexico City. (S)	237
HLA-DRW antigens, in . . . leprosy patients. Rea, T. H. and Terasaki, P. I. (A)	680
Morelos, leprosy control in. Villarreal, J. O. (A)	331
official program of leprosy control in, history of. Ayala Uribe, G. (A)	325
peripheral neuropathy and renal failure in a young . . . woman. Dawson, D. M., <i>et al.</i> (A)	642

Microbiology,

reflections on, of leprosy. Delville, J. (A)	548
workshop on. (S)	291

Micronesia,

acedapsonne in leprosy prevention, field trial, in three high prevalence villages in.	
Russell, D. A., <i>et al.</i> (A)	329
..... (A)	655

Mitomycin C,

transfusion of allogeneic lymphocytes inactivated with, passive transfer of immunity, to leprosy patients. Saha, K., <i>et al.</i> (A)	86
---	----

Morocco,

leprosy in. Sekkat, A., <i>et al.</i> (A)	326
relapse and dapsone resistance in. Rollier, M., <i>et al.</i> (A)	434

Morphology,

analysis of development of therapeutics, ultrastructure of lepromatous leprosy.	
Wilkinson, F. F., <i>et al.</i> (A)	364
changes in mast cells and levels of serotonin and histamine, in leprosy patients.	
Kumar, R., <i>et al.</i> (A)	391

Mother Teresa,

personal. Gordon, G. (N)	624
-------------------------------	-----

Mouth,

clinical study of, in untreated lepromatous leprosy. Girdhar, B. K. and Desikan, K. V. (A)	214
discharge of <i>M. leprae</i> from, in lepromatous leprosy patients. Hubscher, S., <i>et al.</i> (A)	222

Murine leprosy,

attenuation of drug-treated, acid-fast bacilli isolated from mice administered with drugs (<i>in vivo</i>), drug-resistant bacilli (<i>in vitro</i>). Sushida, K. (A)	230
cultivated, pathogenicity of Hawaiian-Ogawa strain, in mice. Kawaguchi, Y., <i>et al.</i> (A)	653
—, —, —, pathogenicity of bacilli from rough colonies. Kawaguchi, Y., <i>et al.</i> (A)	227
experimental, effect of <i>E. coli</i> -12 treated with liquid paraffin against the development of, in mice. Kunigoshi, U., <i>et al.</i> (A)	88
systemic immunological reactivity in the absence of delayed-type hypersensitivity during. Poulter, L. W. (A)	229

Muscle,

biopsies, 18 routine, data supplied by examining, in leprosy. Gray, F., <i>et al.</i> (A)	541
—, electromyographic recording and, in lepromatous leprosy. Sebille, A. and Gray, F. (A)	552
striated, <i>M. leprae</i> in, of tuberculoid leprosy patients. Koranne, R. V., <i>et al.</i> (A)	541

Mycobacterial media,

newly formulated, application in rapid diagnosis of chronic mycobacterial diseases.	
Lew, J., <i>et al.</i> (A)	553

Mycobacteriophage D₂₉,

adsorption of, on <i>M. leprae</i> . David, H. L., <i>et al.</i> (A)	547
interaction of <i>M. leprae</i> and. David, H. L., <i>et al.</i> (A)	548

Mycobacteriosis,	
examination of North American armadillos for. Sanchez, R. M. and Kirchheimer, W. F. (A)	361
Mycobacterium,	
host-phage relationships in the genus, clinical significance. Grange, J. M. and Redmond, W. B. (A)	225
Mycobacterium avium,	
infection of the skin, resembling lepromatous leprosy. Cole, G. W. and Gebhard, J. ... (A)	641
Mycobacterium balnei,	
electroncytochemical study of cytochrome oxidase and peroxidase of, and other mycobacteria. Juscenko, A. A. and Maslov, A. K. (A)	360
Mycobacterium bovis BCG,	
antibody response in rabbits to. Mshana, R. N., <i>et al.</i> (A)	543
phagosome-lysosome fusion and cyclic adenosine 3':5'-monophosphate with, and other mycobacteria. Lowrie, D. B., <i>et al.</i> (A)	649
Mycobacterium fortuitum,	
interaction between . . . and macrophages from mouse peritoneal exudate concerning intracellular ecology. Chu, C. Y. (A)	553
Mycobacterium intracellulare,	
Serotype Davis, comparative experiments in animals with, with reference to pathogenicity and virulence. Peters, M. and Kazda, J. (A)	94
Mycobacterium kansasii,	
action of dapsone on a susceptible strain of. Panitch, M. L. and Levy, L. (A)	94
electroncytochemical study of cytochrome oxidase and peroxidase of, and other mycobacteria. Juscenko, A. A. and Maslov, A. K. (A)	360
Mycobacterium leprae,	
ability of, to produce macrophage activating factors from lymphocytes of leprosy patients. Prasad, H. K., <i>et al.</i> (A)	544
absence of B-glucuronidase in, elevation of enzyme in infected tissues. Prabhakaran, K., <i>et al.</i> (A)	223
acid-fastness of, problems raised by cultivation. Delville, J. (A)	357
activity of combined drugs on, in mice. Pattyn, S. R. (A)	412
— dihydrofolate reductase inhibitors against mouse foot pad infection. Gelber, R. and Levy, L. (A)	409
— thiacetazone, thiambutosine, thiocarlide, and sulfamethoxyipyridazine against, in mice. Colston, M. J., <i>et al.</i> (A)	79
adsorption of mycobacteriophage D ₂₉ on. David, H. L., <i>et al.</i> (A)	547
aminoglycoside antibiotics for, killing potential for various. Gelber, R. and Gibson, J. (A)	684
analysis of mycolates in, using high performance liquid chromatography and mass-spectrometry. Kusaka, T., <i>et al.</i> (A)	667
and diphenoloxidase activity. Kim, S. J., <i>et al.</i> (A)	360
— hamster cheek-pouch cells, host-parasite relationship between. Campo-Aasen, I. and Convit, J. (A)	88
antigen 7, antibody activity against, during first year DDS treatment in lepromatous leprosy. Melsom, R., <i>et al.</i> (A)	85
—, —, variation in antibody content throughout spectrum, effect of DDS treatment, relapse in BT leprosy. Yoder, L., <i>et al.</i> (A)	651
—, formation of antibody against, in armadillos. Harboe, M., <i>et al.</i> (A)	548
antigenic analysis of. Closs, O., <i>et al.</i> (A)	374
— interrelationships of, studies on. Hastings, R. C., <i>et al.</i> (A)	112
—, among selected mycobacterial species relative to, manifested by cell-mediated immunity, in guinea pigs. Shannon, E. J., <i>et al.</i> (A)	674
— relationships, between <i>M. vaccae</i> , <i>M. nonchromogenicum</i> and. Collins, F. M., <i>et al.</i> (A)	113
antithyroid drugs, action of. Levy, L. and Anandan, J. A. (A)	531
athymic rat, immunological status and infection with. Colston, M. J., <i>et al.</i> (A)	679

autoradiographic and metabolic studies of. Khanolkar, S. R., <i>et al.</i>	(A)	225
cell culture of, and of <i>M. lepraemurium</i> . Nomaguchi, H., <i>et al.</i>	(A)	368
cell-mediated immunity to, in mice. Lefford, M. J.	(A)	372
—, induction of, in guinea pigs. Mehra, V. and Bloom, B. R.	(A)	111
.....	(A)	649
—, —, in mice. Patel, P. J. and Lefford, M. J.	(A)	90
cultivated, and antigenic reactions. Skinsnes, O. K.	(A)	360
cultivation, from human skin biopsy. Scollard, D. M. and Honey, N. R.	(A)	365
— trial, in cell-free liquid medium. Nakamura, M.	(A)	669
—, —, enigmatic growth in ND-15 MT and ST medium. Nakamura, M.	(A)	104
death and intracellular degradation of, after exposure <i>in vitro</i> to enzymatic free- radical generators. Delville, J. and Jacques, P. J.	(A)	80
delayed hypersensitivity, attempts to induce to, in healthy individuals and in “burnt-out” lepromatous patients. Smelt, A. H. M., <i>et al.</i>	(A)	377
—, responses in mice and guinea pigs to . . . cytoplasmic proteins, and by other mycobacteria. Watson, S. R., <i>et al.</i>	(A)	650
—, —, —. Collins, F. M. and Morrison, N. E.	(A)	375
—, skin reactions to homologous and heterologous antigens in guinea pigs immunized with, and other mycobacteria. Mustafa, A. S. and Talwar, G. P.	(A)	543
demonstration of, in tissues from bacteriologically negative lepromatous leprosy patients. Krieg, R. E. and Myers, W. M.	(A)	367
discharge of, from mouth, in lepromatous leprosy patients. Hubscher, S., <i>et al.</i>	(A)	222
early cellular response to. Chandi, S. M. and Job, C. K.	(A)	365
.....	(A)	539
— immune responses in nude mice following intravenous infection of. Minagawa, F., <i>et al.</i>	(A)	89
.....	(A)	542
electron microscopic observations of, by means of serial ultrathin sectioning. Hirata, T.	(A)	101
— studies of, during . . . breakdown in human lepromatous tissue. Bourges, M.	(A)	364
electroncytochemical study of cytochrome oxidase and peroxidase of, and other mycobacteria. Juscenko, A. A. and Maslov, A. K.	(A)	360
fetal immunity, lymphocyte responses to, and phytohemagglutinin in mother and baby at birth. Barnetson, R. St. C., <i>et al.</i>	(A)	378
five cultivable mycobacterial strains giving blast transformation and leukocyte migration inhibition of leukocytes analogous to. Mustafa, A. S. and Talwar, G. P. (A)	(A)	544
fluorescence microscopy for detection of, in tissue sections. JARIWALA, H. J. and KELKAR, S. S.	(O)	33
fluorescent leprosy antibody adsorption (FLA-ABS) test for detecting subclinical infection with. Abe, M.	(A)	379
fractionation of antigens of. Gillis, T. P. and Buchanan, T. M.	(A)	674
freezing and storage of, in liquid nitrogen. Hilson, G. R. F. and Colston, M. J.	(A)	368
from infected armadillos, studies on. Draper, P.	(A)	357
growth of, in thyroxine treated culture medium. Biswas, S. K.	(A)	87
heat stability of . . . immunogenicity. Shepard, C. C., <i>et al.</i>	(A)	654
hedgehogs (<i>Erinaceus europaeus</i>), inoculation with. Klingmüller, G.	(A)	374
ICRC bacilli, effect of vaccine from, against mouse foot pad infection. Bhide, M. B., <i>et al.</i>	(A)	339
identification of. Kirchheimer, W. F., <i>et al.</i>	(A)	666
immunity to infections, induced in mice by BCG vaccination, before and after challenge. Shepard, C. C., <i>et al.</i>	(A)	90
immunization, with antigen, in mice. Shepard, C. C. and Minagawa, F.	(A)	115
in the striated muscle of tuberculoid leprosy patients. Koranne, R. V., <i>et al.</i>	(A)	541
— tissue cultures of the nine-banded armadillo (<i>Dasypus novemcinctus</i>). Fieldsteel, A. H., <i>et al.</i>	(A)	669
-induced suppression of <i>in vitro</i> responses, in leprosy patients. Mehra, V., <i>et al.</i>	(A)	373
<i>in vitro</i> activation of, neutrophils by suspensions of. GOHMAN-YAHR, M., <i>et al.</i>	(O)	570
— lymphoproliferative response to, in normal siblings, of lepromatous leprosy patients. Stoner, G. L., <i>et al.</i>	(A)	374

—, of HLA-D-identical siblings, —. Stoner, G. L., <i>et al.</i> (A)	546
<i>in vitro</i> test, for drug response and drug resistance of, using labelled metabolites.	
Ambrose, E. J., <i>et al.</i> (A)	410
inoculation, into 3 species of autochthonous armadillos, in Argentina. Balaña, L. M., <i>et al.</i> (A)	339
interaction of, and mycobacteriophage D ₂₉ . David, H. L., <i>et al.</i> (A)	548
intracytoplasmic . . . antigen, in inflammatory exudate of reactional lepromatous leprosy. González-Mendoza, A., <i>et al.</i> (A)	383
isolation of, using semisynthetic solid agar medium. Murohashi, T. and Yoshida, K. . . (A)	225
-lepromin, comparative study of skin reactions in leprosy patients to, and to antigens from cultivable saprophytic mycobacteria. Sharma, R. C. and Singh, R. (A)	546
leucine, stimulating effect of, on the growth of. Murohashi, T. and Yoshida, K. (A)	226
lymphocyte response, to human-derived and purified armadillo-derived . . . BCG and PPD. Smelt, A. H. M., <i>et al.</i> (A)	224
— transformation test, decreased lymphocyte reactivity to, in lepromatous leprosy. Faber, W. R., <i>et al.</i> (A)	539
—, in leprosy patients, presence of phytohemagglutinin, lepromin and, in culture medium with normal homologous serum. Pagnano, P. M. G., <i>et al.</i> (A)	389
lymphoproliferative response, role of macrophages in, <i>in vitro</i> . Hirschberg, H. (A)	649
^{99m} TcO ₄ brain scan in . . . infection. Raizada, N., <i>et al.</i> (A)	418
NI (neuron invasion) gene of. Barksdale, L. (A)	358
neonatally thymectomized Lewis rats, infected, combination dapsone-rifampin therapy in. Fieldsteel, A. H. and Levy, L. (A)	108
—, —, histopathologic and electron microscopic observations. Dawson, P. J., <i>et al.</i> . . . (O)	561
neuritis after intradermal tests, in tuberculoid leprosy patients. Serial, A. (A)	426
ocular histopathology, in experimentally infected animals, . . . and <i>M. lepraemurium</i> in mice. Hobbs, H. E., <i>et al.</i> (A)	549
—, —, infection in the 9-banded armadillo (<i>Dasypus novemcinctus</i>). McDougall, A. C., <i>et al.</i> (A)	549
other mycobacteria and a possible vaccine. Stanford, J. C., <i>et al.</i> (A)	357
penicillin, effect of, on experimental infection in mice. Delville, J., <i>et al.</i> (A)	227
persistency and drug resistance of, obstacles to chemotherapy of lepromatous leprosy. Levy, L. (A)	408
pleomorphic organism with non-mycobacterial, cultivable, precursor phase. Chatterjee, B. R. (A)	359
“proportional bactericidal test,” to assess drug activity against. Colston, M. J., <i>et al.</i> (A)	79
protein derivative, from . . . suspensions, in semi-synthetic medium. Kantor, I. de, <i>et</i> <i>al.</i> (A)	387
purified armadillo-derived (PAD), immunological studies in guinea pigs and man, on bacteria and cell-free extracts of. Rees, R. J. W., <i>et al.</i> (A)	380
pyridine extractability of acid-fastness from. McCORMICK, G. T. and SANCHEZ, R. M. (O)	495
— extraction of. Convit, J. (C)	517
quantitative aspects of experimental infection of armadillos with. Kirchheimer, W. F., <i>et al.</i> (A)	337
rifampin and isoprodian combined, to treat infection in mice. Matsuo, Y., <i>et al.</i> (A)	531
serum glycoprotein studies in armadillos experimentally infected with. Harris, E. B., <i>et al.</i> (A)	344
skin reactions, to -lepromin and to ICRCin, antigen from cultivable acid-fast bacilli from. Bapat, C. V. (A)	381
— reactive antigens of. Ulrich, M., <i>et al.</i> (A)	386
— test, responsiveness, using soluble . . . antigen, and <i>M. tuberculosis</i> antigen, and mixture of two, investigation of mechanisms regulating. Samuel, N. M., <i>et al.</i> (A)	385
—, trial, with non-acid-fast organism from leprosy tissues, to establish immunological identity with. Delville, J. and Chatterjee, B. R. (A)	366
specific and nonspecific resistance, in mice immunized with irradiated. Patel, P. J. and Lefford, M. J. (A)	116
	(A) 229

— antibodies, detected by radioimmunoassay. Harboe, M., <i>et al.</i>	(A)	84
— protein antigen, serodiagnosis of leprosy. CALDWELL, H. D., <i>et al.</i>	(A)	114
.....	(O)	477
— vaccine, on cell-mediated immunity of armadillos against. Kirehheimer, W. F., <i>et al.</i>	(A)	390
streptomycin, evaluation of activity of. Pattyn, S. R. and Saerens, E.	(A)	531
susceptibility of armadillos to infection by. Innami, S., <i>et al.</i>	(A)	339
systemic macrophage activation in . . . immunized mice. Patel, P. J.	(A)	679
Triton WR-1339 and Macrocydon, effect of treatment <i>in vivo</i> with, on mouse foot		
pad infection. Delville, J. and Jacques, P. J.	(A)	80
ultrastructural study, . . . obtained from a human leproma. Sanabria, N. J.	(A)	364
—, of cells in peritoneal exudate of mice exposed to. Diaz Almeida, J. G., <i>et al.</i>	(A)	365
ultrastructure, comparative, of . . . and <i>M. lepraemurium</i> cell envelopes. Nguyen,		
H.T., <i>et al.</i>	(A)	652
—, of . . . in human leproma. Sanabria, Kh., <i>et al.</i>	(A)	652
vaccination experiments with . . . preparations, and with cultivable mycobacteria.		
Shepard, C. C.	(A)	677
vaccine from ICRC bacilli, against mouse foot pad infection. Bhide, M. B., <i>et al.</i>	(A)	537
viability of, outside human body. Desikan, K. V. and Sreevatsa	(A)	366
yeast glucan, therapeutic effect in mice infected with. Delville, J. and Jacques, P. J. ..	(A)	227
<i>Mycobacterium lepraemurium,</i>		
analysis of mycolates in <i>M. leprae</i> and, using high performance liquid		
chromatography and mass-spectrometry. Kusaka, T., <i>et al.</i>	(A)	667
and phenoloxidase activity. Kim, S. J., <i>et al.</i>	(A)	651
antigenic substances of. Mzkino, M., <i>et al.</i>	(A)	397
cell culture of <i>M. leprae</i> and. Nomaguchi, H., <i>et al.</i>	(A)	368
continuous <i>in vitro</i> growth of. Dhople, A. M. and Hanks, J. H.	(A)	103
.....	(A)	361
cord factor of <i>in vivo</i> -derived. Goren, M. G., <i>et al.</i>	(A)	651
cultivation of, in flask system. Nakamura, M.	(A)	369
cytochromes of. Mori, T.	(A)	369
delayed-type hypersensitivity, development of, in infections in resistant and		
susceptible strains of mice. Alexander, J. and Curtis, J.	(A)	652
—, relationship between, and the progression of . . . infection. Poulter, L. W. and		
Lefford, M. J.	(A)	230
effects of anionic inhibitors of phagosome-lysosome fusion, in cultured macrophages,		
. . . as ingested organism. Draper, P., <i>et al.</i>	(A)	653
electron microscopic observations, by means of serial ultrathin sectioning. Hirata, T. (A)		101
—, of intracytoplasmic membrane systems and cell division in. HIRATA, T.	(O)	585
electron transport and ATP generation in host-grown. Ishaque, M., <i>et al.</i>	(A)	363
electrocytochemical study of cytochrome oxidase and peroxidase of, and other		
mycobacteria. Juscenko, A. A. and Maslov, A. K.	(A)	360
endocytic ability of peripheral blood leukocytes, measured by capacity to ingest . . .		
<i>in vitro</i> . Rojas-Espinosa, O. and Aponte-Vázquez, J.	(A)	422
growth factors of, egg yolk protein fraction. Mori, T. and Nyein, M. M.	(A)	103
— of, in mouse, human, and chick cells, by soft agar technique. Nomaguchi, H., <i>et al.</i>	(A)	667
—, in non-stimulated and stimulated mouse peritoneal-derived and bone marrow-		
derived macrophages <i>in vitro</i> . Alexander, J. and Smith, C. C.	(A)	536
interaction of, and BCG infections in mice. Lefford, M. J.	(A)	678
— <i>M. microti</i> and, with mouse polymorphonuclear leukocytes. Smith, C. C., <i>et al.</i> ..	(A)	658
lymphocyte function in progressive . . . infection. Banerjee, D. K.	(A)	385
Mitsuda-type lepromin reactions as a measure of host resistance in . . . infection.		
Curtis, J. and Turk, J. L.	(A)	652
ocular histopathology in animals experimentally infected with <i>M. leprae</i> and, in the		
mouse. Hobbs, H. E., <i>et al.</i>	(A)	549
—, in the 9-banded armadillo. McDougall, A. C. and Rees, R. J. W.	(A)	549
partial inhibition of the growth of, in C3H mice immunized with cell wall skeletons.		
TANAKA, Y.	(O)	487

phagosome-lysosome fusion and cyclic adenosine 3':5'-monophosphate in macrophages infected with, or other mycobacteria. Lowrie, D. B., <i>et al.</i> (A)	649
radiometric measurement of differential metabolism of fatty acids by. CAMARGO, E. E., <i>et al.</i> (O)	126
serum from infected mice suppresses macrophage-mediated immunity in . . . infection. Preston, P. M. (A)	653
sulfones and rifampin on growth of, in macrophage diffusion chamber cultures. Rightsel, W. A., <i>et al.</i> (A)	218
ultrastructure, comparative, of <i>M. leprae</i> and . . . cell envelopes. Nguyen, H. T., <i>et</i> <i>al.</i> (A)	652
<i>Mycobacterium marinum</i>,	
granuloma, ultrastructure of, in man. Marsch, W. C., <i>et al.</i> (A)	234
<i>Mycobacterium microti</i>,	
interaction of . . . and <i>M. lepraemurium</i> , with mouse polymorphonuclear leukocytes. Smith, C. C., <i>et al.</i> (A)	658
phagosome-lysosome fusion and cyclic adenosine 3':5'-monophosphate in macrophages infected with, and other mycobacteria. Lowrie, D. B., <i>et al.</i> (A)	649
<i>Mycobacterium nonchromogenicum</i>,	
cytoplasmic proteins, delayed hypersensitivity responses in mice and guinea pigs to, and other mycobacteria. Watson, S. R., <i>et al.</i> (A)	650
<i>Mycobacterium tuberculosis</i>,	
electroncytochemical study of cytochrome oxidase and peroxidase of, and other mycobacteria. Juscenko, A. A. and Maslov, A. K. (A)	360
immunoregulation in infection caused by. Katz, P., <i>et al.</i> (A)	657
soluble antigen, and of <i>M. leprae</i> , and mixture of the two, investigation of mechanisms regulating skin test responsiveness in leprosy patients. Samuel, N. M., <i>et al.</i> (A)	385
<i>Mycobacterium vaccae</i>,	
antigenic evaluation of, mycobacterium possibly related taxonomically to <i>M. leprae</i> . Navalkar, R. G., <i>et al.</i> (A)	390
cytoplasmic protein, antigens, delayed hypersensitivity responses to <i>M. leprae</i> and. Collins, F. M. and Morrison, N. E. (A)	375
—, delayed hypersensitivity responses in mice and guinea pigs to, and other mycobacteria. Watson, S. R., <i>et al.</i> (A)	650
<i>Mycobacterium w</i>,	
ability of <i>M. leprae</i> , . . . , and ICRC bacillus to produce macrophage activating factors from lymphocytes of leprosy patients. Prasad, H. K., <i>et al.</i> (A)	544
local reactions to intradermal instillation of . . . and ICRC bacilli in mice. Fotedar, A., <i>et al.</i> (A)	540
<i>Mycobacterium xenopi</i>,	
sensitin, skin sensitivity of adults on the Isthmus of Panama to. Larrabee, W. F., Jr. and Talavera, R. (A)	553
Mycolates,	
in <i>M. leprae</i> and, analysis of, using high performance liquid chromatography and mass-spectrometry. Kusaka, T., <i>et al.</i> (A)	667
Nerve(s),	
changes in leprosy. Klingmüller, G. (A)	84
conduction velocities, respective importance of different, in leprosy. Seville, A. (A)	552
cranial, involvement of, with reference to treatment, in leprosy. Namba, M. and Kobayashi, S. (A)	428
damage, permanent, prevention of, reversal reaction, short and long-term steroid treatment compared. NAAFS, B., <i>et al.</i> (O)	7
—, prospects for study and application for therapy, in leprosy. Pearson, J. M. H. (A)	426
—, quantitative study, in leprosy. Ramchandra Bhat, K., <i>et al.</i> (A)	341
decompression, elective surgical, technics and results, in leprosy. Pandya, N. J., <i>et</i> <i>al.</i> (A)	76

—, pathological and hemodynamic bases of. Carayon, A. (A)	425
electrophysiological evidence for motor-unit impairment during treatment. Seville, A. (A)	428
function, assessment of, in leprosy. Naafs, B. and van Droogenbroeck, J. B. A. (A)	427
greater auricular nerve in diagnosis of. Lynch, P. (A)	534
hypertrophy, major tuberculoid leprosy with. Cottenot, F. and Penneec, J. (A)	84
involvement, ultrastructure of beginning and progressive, in leprosy patients. Boddingius, J. (A)	425
leprosy, an infectious and immunological disorder of the nervous system. Dastur, D. K. (A)	645
lesions, evolution of, in leprosy. Antia, N. H., <i>et al.</i> (A)	427
motor, conduction velocity, in leprosy, correlation with clinical and histological findings. Chopra, J. S., <i>et al.</i> (A)	427
nervous system, in leprosy. Dastur, D. K. (A)	646
non-myelin human, antigen producing granulomatous hypersensitivity in rabbits. Hardwicke, P. M. D. and Crawford, C. L. (A)	341
peripheral, biopsies in leprosy diagnosis, in Aboriginal patients, Northern Territory of Australia. McDougall, A. C., <i>et al.</i> (A)	534
—, ultrastructural changes in blood vessels of, and of skin in leprosy patients. Boddingius, J., <i>et al.</i> (A)	430
review of recent findings concerning a case of leprosy affecting the. Khoubessarian, P., <i>et al.</i> (A)	642
segmental demyelination in, in human and mouse model, assessed by teased fiber technique, with electrophysiological correlation. Shetty, V. P., <i>et al.</i> (A)	429
sensory peripheral, as antigen, skin lesions, granulomatous hypersensitivity, cutaneous . . . damage. Crawford, C. L. and Hardwicke, P. M. D. (A)	340
superficial peroneal . . . thickening, as early diagnostic sign, in leprosy. Vaidyanathan, E. P. and Vaidyanathan, S. I. (A)	79
surgery, in leprosy. van Droogenbroeck, J. B. A. and Naafs, B. (A)	452
ulnar, calcified abscess in the, in a leprosy patient. Lichtman, D. M., <i>et al.</i> (A)	642
—, paralysis, surgical treatment of, in leprosy. Palande, D. D. (A)	451
Neuritis,	
adaptation of decompression methods, to clinical forms of. Carayon, A. (A)	451
after intradermal tests with <i>M. leprae</i> , in patients with tuberculoid leprosy. Serial, A. (A)	426
decompression in leprosy, as a therapeutic and preventive measure. Bose, K. S. (A)	451
experimental allergic. Vaidya, M. C., <i>et al.</i> (A)	341
— sensory poly-, electrophysiological studies of, in rabbits. Pascoe, J. E. and Crawford, C. L. (A)	341
leprosy, pathological and immunological basis of medical intervention in. Job, C. K. .. (A)	426
rifampin-associated, symptomatic neuritic leprosy, precipitated by rifampin and isoniazid treatment of tuberculosis and. Goodwin, C. S., <i>et al.</i> (A)	428
Neuropathy,	
autonomic, in leprosy, cardiovascular evaluation. Radhakrishnan, K., <i>et al.</i> (A)	215
compression, of the radial nerve, in leprosy. Charosky, C., <i>et al.</i> (A)	450
correlations of <i>in vitro</i> electrophysiological, light, and electronmicroscopical studies in, in leprosy. Pandya, S. S., <i>et al.</i> (A)	430
multiple mono-, in lymphomatoid granulomatosis, similarities to leprosy. Garcia, C. A., <i>et al.</i> (A)	533
peripheral, and renal failure, in a young Mexican woman. Dawson, D. M., <i>et al.</i> (A)	642
— vascular deficit, in leprosy, role in pathogenesis of. Kaur, S., <i>et al.</i> (A)	429
results of surgical treatment, in leprosy. Ganopol, J., <i>et al.</i> (A)	452
Neutrophil(s),	
activation in adjuvant disease, implications for reactional lepromatous leprosy. Convit, J., <i>et al.</i> (A)	382
<i>in vitro</i> activation of, by suspensions of <i>M. leprae</i> . GOIHMAN-YAHR, M., <i>et al.</i> (O)	570
significance of activation, in reactional lepromatous leprosy, effects of thalidomide <i>in</i> <i>vivo</i> and <i>in vitro</i> . Gohman-Yahr, M., <i>et al.</i> (A)	220

New Guinea (Papua),		
Karimui, acedapson (DADDS) trial, ten year status, of leprosy patients. Russell, D. A., <i>et al.</i>	(A)	435
—, leprosy in, genetic susceptibility investigated. Shields, E. D., <i>et al.</i>	(A)	334
New Hebrides,		
epidemiology of leprosy in. Ratard, R. C. and Bravo, L. I.	(A)	92
Nicaragua,		
past, present, and future of leprosy in. Gomez Urcayo, F., <i>et al.</i>	(A)	331
psycho-social change, in National Dermatological Center, in leprosy. Soto-Garcia, G., <i>et al.</i>	(A)	404
Niskanen, O.,		
personal.	(N)	202
Nobel Prize,		
Mother Teresa receives. Gordon, G.	(N)	624
Nocardiae,		
immunological relatedness of ribosomes, from mycobacteria, . . . , and corynebacteria, and microorganisms in leprosy lesions. Laub, R., <i>et al.</i>	(A)	542
Norway,		
medical researcher position available at AHRI.	(N)	619
Nose,		
evolution of nasal mucosal lesions, histopathological study, in leprosy. Mehta, L., <i>et</i> <i>al.</i>	(A)	416
in treated lepromatous leprosy, clinical and histopathological studies of the. Barton, R. P. E., <i>et al.</i>	(A)	348
primary leprosy involvement of nasal mucosa, in apparently healthy household contacts, of leprosy patients. Chacko, C. J. G., <i>et al.</i>	(A)	417
Nude mice,		
albino (<i>Mus musculus</i>), experimental cutaneous leishmaniasis with <i>Leishmania</i> <i>tropica</i> in. Packchianian, A.	(A)	554
as an experimental lepromatous leprosy model, enhancing effect of thymus cells. Nakamura, K. and Yogi, Y.	(A)	105
chemotherapy of leprosy with. Kohsaka, K., <i>et al.</i>	(A)	338
establishment of experimental leprosy in. Kohsaka, K., <i>et al.</i>	(A)	107
figures of multiplication of acid-fast bacilli in the macrophage of, electron microscope findings. Fukunishi, Y., <i>et al.</i>	(A)	673
for research in leprosy. Kohsaka, K.	(A)	228
for research in leprosy. Kohsaka, K.	(A)	668
for research in leprosy. Kohsaka, K.	(A)	337
Obituaries,		
Khanolkar, V. R.	(Ob)	197
Mehta, J. N.	(Ob)	197
Théorêt, P. E. Skinsnes, O. K.	(Ob)	198
Torsuev, N. A. Juscenko, A., <i>et al.</i>	(Ob)	61
Onchocerciasis,		
and lepromatous leprosy. Prost, A., <i>et al.</i>	(A)	654
Ophthalmology,		
Dr. Margaret Brand lectures on, at Schieffelin Leprosy Research Centre.	(N)	203
Panama,		
skin sensitivity of adults on the Isthmus of, to <i>M. xenopi</i> sensitin. Larrabee, W. F., Jr. and Talavera, R.	(A)	553
Paraguay,		
Leprosy Board of, present control program. Masi, D. A.	(A)	405

Passive transfer,		
of immunity to leprosy patients, by transfusion of allogeneic lymphocytes, inactivated by mitomycin C, attempt at. Saha, K., <i>et al.</i>	(A)	86
Pathology,		
at International Congresses. AZULAY, R. D., <i>et al.</i>	(C)	63
changes in testis and epididymis of infertile leprolic males. IBRAHEM, A. A., <i>et al.</i>	(O)	44
of leprosy. Ridley, D. S.	(A)	636
— tropical and extraordinary diseases. Binford, C. H. and O'Connor, D. H.	(B)	206
Peroxidase,		
electron microscopy of, and acid phosphatase, in leprosy and uninfected armadillo macrophages. McKeever, P. E., <i>et al.</i>	(A)	228
PHA, (see phytohemagglutinin),		
Phagocyte(s),		
defective blood mononuclear . . . function, in leprosy patients. ESTEVEZ, M. E., <i>et</i> <i>al.</i>	(O)	575
mononuclear- . . . series, cellular responses in leprosy and related diseases, with reference to cells of the. Ridley, M. J., <i>et al.</i>	(A)	393
surface markers on lymphocytes and cells of the mononuclear . . . series, in skin sections, in leprosy. Ridley, M. J., <i>et al.</i>	(A)	86
Phagocytosis,		
in leprosy, endocytic ability of peripheral blood leukocytes, measured by capacity to ingest <i>M. lepraemurium in vitro</i> . Rojas-Espinosa, O. and Aponte-Vázquez, J.	(A)	422
Phenoloxidase,		
<i>M. leprae</i> and. Kim, S. J., <i>et al.</i>	(A)	651
Philippines,		
DDS chemoprophylaxis, for children, at Culion Sanitarium, Palawan. Lara, C. B.	(A)	216
Mercado, Dr. R., becomes Director of Health Services Development and Planning, for WHO Western Pacific Regional Office.	(N)	203
Phosphatase,		
acid, electron microscopy of peroxidase and, in leprosy and uninfected armadillo macrophages. McKeever, P. E., <i>et al.</i>	(A)	228
Phytohemagglutinin (PHA),		
<i>in vitro</i> modulation of lymphocyte responses to, by plasma, in mother and baby at birth. Bjune, G., <i>et al.</i>	(A)	538
<i>in vivo</i> effect of DDS on -induced lymphocyte transformation cultures, in normal healthy volunteers. SENGUPTA, U., <i>et al.</i>	(O)	167
lymphocyte responses to <i>M. leprae</i> and, in mother and baby, at birth, fetal immunity in leprosy. Barnetson, R. St. C., <i>et al.</i>	(A)	378
— transformation test (LTT) in leprosy patients, presence of . . . in culture medium with normal homologous serum. Pagnano, P. M. G., <i>et al.</i>	(A)	389
skin test in leprosy patients, compared with other delayed type hypersensitivity skin tests. Ozawa, T., <i>et al.</i>	(A)	422
Portugal,		
Council for International Organizations of Medical Sciences meets.	(N)	71
Postage stamp(s),		
official stamping of the commemorative postage stamp of the XI International Leprosy Congress.	(S)	262
Pregnancy,		
leprosy in. Maurus, J. N.	(A)	214
Protein,		
identification of an <i>M. leprae</i> specific . . . antigen, possible application for serodiagnosis of leprosy. CALDWELL, H. D., <i>et al.</i>	(A)	114
serum, polymorphisms, genetic markers and leprosy in South African Negroes. Hitzeroth, H. W., <i>et al.</i>	(O)	477
Hitzeroth, H. W., <i>et al.</i>	(A)	551

synthesis, of macrophages from resistant and susceptible hosts, role as studied by. Birdi, T. J., <i>et al.</i>	(A)	537
Prothionamide,		
administration, of combination of isoniazid, DDS, and, in pulmonary tuberculosis, in adults, clinical report. Orłowski, E. H.	(A)	82
effect of ethionamide and, in experimental leprosy. Pattyn, S. R.	(A)	229
experimental studies on antileprosy activity of ethionamide and. Colston, M. J., <i>et</i> <i>al.</i>	(A)	79
results of treating leprosy patients with. Bragina, V. S.	(A)	437
Pseudocholesterase,		
types, distribution of, in leprosy patients. Navarrete, J. I., <i>et al.</i>	(A)	344
Pseudomonas putrefaciens,		
opportunistic infection of chronic skin ulcers with. Applebaum, P. C. and Bowen, A. J.	(A)	74
Psoriasis,		
and leprosy, in light of common history. Eckes, L. K.	(A)	527
Pyoderma gangrenosum,		
clofazimine in the treatment of. Thomsen, K. and Rothenborg, H. W.	(A)	554
Pyridine,		
extractability, of acid-fastness from <i>M. leprae</i> . McCORMICK, G. T. and SANCHEZ, R. M.	(O)	495
extraction of <i>M. leprae</i> . CONVIT, J.	(C)	517
reply to Dr. Convit's Letter to the Editor. SŁOSAREK, M.	(C)	518
Rabbit(s),		
antibody response in, to <i>M. bovis</i> BCG. Mshana, R. N., <i>et al.</i>	(A)	543
electrophysiological studies of experimental sensory polyneuritis in. Pascoe, J. E. and Crawford, C. L.	(A)	341
non-myelin human nerve antigen producing granulomatous hypersensitivity in. Hardwicke, P. M. D. and Crawford, C. L.	(A)	341
Radioactivity,		
distribution in pregnant mice of, after injection of ¹³¹ I and immunosuppressive effects, after whole body irradiation. Sushida, K. and Nakano, H.	(A)	231
Radioimmunoassay,		
<i>M. leprae</i> specific antibodies detected by. Harboe, M., <i>et al.</i>	(A)	84
Radio-immunology,		
detection of the surface antigen and the antibody of hepatitis B by. Chiron, J. P., <i>et</i> <i>al.</i>	(A)	532
measurement of differential metabolism of fatty acids by <i>M. lepraemurium</i> . CAMARGO, E. E., <i>et al.</i>	(O)	126
Radiology,		
bone absorption in fingers, in leprosy, ten-year study. MacMoran, J. W. and Brand, P. W.	(A)	671
Reaction,		
and levamisole (R 12564). Cardama, J. E., <i>et al.</i>	(A)	440
clinical aspects, reactional episodes. Hastings, R. C.	(A)	348
comparison of, to Dharmendra antigen, in normal skin and lesion, of leprosy patients. Price, J., <i>et al.</i>	(A)	535
early and late, in tuberculoid and lepromatous leprosy patients, with lepromins from <i>M. leprae</i> and five selected cultivable mycobacteria. Mustafa, A. S. and Talwar, G. P.	(A)	543
immunofluorescence studies, with reference to treatment. Faber, W. R., <i>et al.</i>	(A)	220
immunological studies, in leprosy patients treated with thalidomide. Rodríguez- Padilla, C., <i>et al.</i>	(A)	396
lepra, nine thalidomide derivatives in, study of. Skeskin, J.	(A)	218
liver, involvement of, in leprosy. Tolentino, M. M., <i>et al.</i>	(A)	353

local, to intradermal instillation of <i>M. w</i> and ICRC bacilli in mice. Fotedar, A., <i>et al.</i> (A)	540
Mitsuda-type lepromin, as a measure of host resistance to <i>M. lepraemurium</i> infection.	
Curtis, J. and Turk, J. L. (A)	652
neutrophil activation in, in adjuvant disease, effects of thalidomide <i>in vivo</i> and <i>in vitro</i> .	
Goihman-Yahr, M., <i>et al.</i> (A)	220
—, —, implications for. Convit, J., <i>et al.</i> (A)	382
polymorphonuclear activation in, effects of thalidomide <i>in vivo</i> and <i>in vitro</i> .	
Goihman-Yahr, M., <i>et al.</i> (A)	373
reversal, histopathologically documented, following treatment with transfer factor, in lepromatous leprosy. Hastings, R. C. and Job, C. K. (A)	439
—, in lepromatous leprosy patients, after transplantation of human fetal thymic grafts. Saha, K., <i>et al.</i> (A)	223
—, nerve damage, permanent, short and long-term steroid treatment. NAAFS, B., <i>et al.</i> (O)	7
skin, delayed hypersensitivity, to lepromin, and antigens prepared from four other mycobacteria. Govil, D. C. and Bhutani, L. K. (A)	540
—, —, to lepromins prepared from <i>M. leprae</i> and selected cultivable mycobacteria.	
Hogerzeil, L. M. and Prabduhass, N. (A)	541
—, induced by lepromin and four other mycobacterial antigens. Sahib, H. S. M. and Vellut, C. (A)	545
—, to <i>M. leprae</i> -lepromin and to antigens from cultivable saprophytic mycobacteria.	
Sharma, R. C. and Singh, R. (A)	546
treatment, of lepromatous lepra, with reference to thalidomide. Sheskin, J. (A)	433
